

Certificate of Product Approval

Certificate Number: 1396b

Issue: 01

CGT Security Limited

Innovation House
Boulton Road
Reading
Berkshire
RG2 0NH

is authorised to use the LPCB mark in association with the product(s) listed in this certificate and appendix having complied with the requirements of the standard(s) detailed below:

Products

StackDoor Secure
security shutters

Standard

LPS 1175: Issue 8
Requirements and testing procedures for the LPCB approval and listing of intruder resistant building components, strongpoints, security enclosures and free-standing barriers

This certificate and appendix is maintained and held in force through regular surveillance activities

Appendix to Certificate No: 1396b CGT Security Limited

Issue: 01

Security Shutters

Product Name	Type	Minimum Structural Opening Height (m)	Maximum Structural Opening Height (m)	Minimum Structural Opening Width (m)	Maximum Structural Opening Width (m)	Security Rating	LPCB Ref No.
StackDoor Secure	Internally or externally face fixed stackable security shutter	2.0	10	0.76	6.0	A1 (SR1)	1396b/01
	Reveal fixed stackable security shutter	2.0	10	1.0	6.24		

Approved Installation Configurations¹

Product Name	Type	Substrate					
		Timber	Brickwork / Blockwork	Concrete	Reinforced Brickwork / Blockwork	Reinforced Concrete	Structural Steelwork
StackDoor Secure	Internally or externally face fixed stackable security shutter	✓	✓	✓	✓	✓	✓
	Reveal fixed stackable security shutter	✓	✓	✓	✓	✓	✓

Notes:

1. The installation shall be direct to the substrate and not via intermediate substrates, such as plasterboard.
2. The approval covers the stackable security shutters formed from Zintec or stainless steel profiles and pins.
3. The approval only applies to the shutters when installed and operated strictly in accordance with the instructions titled 'Stackdoor-Installation and assembly instruction, Rev 3: Mar2019' and 'Stackdoor-Operation and maintenance manual, Rev 3: Mar2019'.
4. The resistance of the access control unit to "non-mechanical" attack has not been assessed as it is outside the scope of LPS 1175. Likewise, the approval does not cover possible effects of any susceptibilities relating to the functionality and performance of any access control equipment that may be used to operate the shutter. This is because the scope of access control devices and system configurations that may be used with the shutter is "infinite". It is therefore recommended that specifiers satisfy themselves that the components used are either resistant to mechanical and other forms of tampering/abuse, or that they are suitably protected from such tampering/abuse and are resistant to any environmental conditions/interference that may cause the shutter to open.

This certificate and appendix is maintained and held in force through regular surveillance activities
