
LPCB Red Book

1 Part: 3

Automatic sprinkler, water
spray and deluge systems

bre

Foreword by the United Arab Emirates (UAE) Acting Commander in Chief, Major General Rashid Thani Al Matrooshi

As the dynamic environment in our Region progresses, we the UAE Civil Defence Authority, has set forth a number of strategic goals for the delivery of public safety. Our strategic goals observe both the national and Ministry of Interior's strategic plan by;

“Providing an effective firefighting and emergency response system delivered by qualified and well trained people using the latest technologies to ensure lives and properties are safeguarded”

As a result, the UAE can be 'benchmarked' with other Countries that are witnessing a decline in fires and incidents when compared to the density of population. As an example, the number of fire incidents has been reduced by 39% in 2011 compared to 2010, with a marked reduction in small and medium fire incidents, together with a high percentage achievement of a 9 minute response time for first attendance at incidents.

“Providing excellent performance and support during disasters and crises”

Confirmation of performance and support are achieved during disasters and crisis situations. Civil Defence Departments conduct a range of joint fire safety and evacuation drills in association with other safety agencies for both the public and private sectors. Evacuation drills carried out in Dubai during 2011 was estimated at 356 drills, which targeted 178,530 persons. Customer satisfaction percentage achieved was 97.2%. The number of drills carried out has increased by 142.4% compared to the target number set out in our annual plan.

“Spreading a fire safety and awareness culture across the community “

In this regard, a National Safety campaign was launched targeting 'domestic safety' with an achieved target of 50% of homes in UAE being visited during a six month period. This was aimed at preventive awareness and removing violations which threaten public safety. During the campaign, 206,490 houses (61.4% of the total dwellings) were visited, again with a marked customer satisfaction percentage of 92%.

Similarly a National Safety campaign was also executed at industrial areas, with teams visiting industrial facilities at different industrial areas across the country. 31,647 facilities were inspected. The teams also managed to correct violation situations in 13,400 facilities and 53,426 people were trained in the basic skills of firefighting and awareness.

“Equipping operations with the best and appropriate equipment and technologies”

The latest state of the art technologies have been introduced for various services such as, 'e-engineering' for online drawing approval and the '24 x 7 smart system' for building electronic monitoring and protection. Currently 61.7% of buildings are connected to the system and 95.7% surveyed for connection.

In addition, the 'UAE Fire and Life Safety Code of Practice' with our Standard Operating Procedures (SOPs) is considered a first in the region. This will contribute to reduced costs and effort. Ultimately this will result in a decrease in accidents and improve command and control mechanisms.

“Achieving Strategic Partnership with Public/Private and Voluntary Organizations”

By ensuring, through careful selection, that products, systems and installers are approved with a listing by Civil Defence, following rigorous third party certification. This ensures that locally we receive the best performance of fire safety products, systems and technologies.

LPCB is widely recognised as an independent reference for all fire and security safety experts. Their testing laboratories and approvals services together with their leading team of highly qualified expert scientists and engineers, guides us all impeccably towards a qualified framework.

Major General Rashid Thani Al Matrooshi

Introduction

BRE Global Ltd, based in the UK near London, is an independent third party organisation offering certification of fire, security and sustainability products and services to an international market. LPCB is the certification brand used for fire and security products and services. The LPCB mark is accepted worldwide. We have representative offices in China, India and Dubai. We are owned by the BRE Trust, a not-for-profit organisation.

LPCB listings can be accessed, free of charge, at www.redbooklive.com or via apps from Apple, Google and Windows.

BRE Global Ltd is also a Notified Certification Body and Notified Test Laboratory for:-

- Construction Products Regulation
- Pressure Equipment Directive
- Marine Equipment Directive
- Transport Pressure Equipment Directive

BRE Global additionally carries out:

- Fire Investigation
- Fire Risk Assessment
- Fire Safety Engineering
- Research
- Training

LPCB Listings

VOLUME 1 LIST OF APPROVED PRODUCTS AND SERVICES

Listings are given in sections which list related groups of products and services such as suppression, security and so on. Each section also summarises the technical basis for the certification of each product or service. The Red Book listings should always be used in conjunction with rules, regulations and design specifications required by the relevant Authority having jurisdiction.

Listings comprise:

Volume 1: (This Volume)

- **Fire detection and alarm products, systems, and cables**
- **Manual fire extinguishing equipment**
- **Automatic sprinkler, water spray and deluge systems**
- **Fixed fire fighting products and systems**
- **Watermist systems**
- **Related installers**

Volume 2:

- Passive fire protection products
- Security protection products
- Fire doors and shutters
- Smoke and fire ventilation systems
- Security Assessments - SABRE
- Related installers
- Management Systems
- Construction products

Listings are given in the name of the manufacturer or service provider, in alphabetical order. They can be downloaded free of charge from our website at www.redbooklive.com and also via an App that is available free from Apple iStore (for iPhone and iPad), from Google Play, (for Android phones and tablets) and Windows Store (for Windows 8 phones).

Updates

Certification of products and services are updated regularly. To ensure that you are using the most up to date information please refer to www.redbooklive.com or download from the App from the website home page.

What is Third Party Certification?

A frequent concern of stakeholders is in knowing whether a product will perform in accordance with the stated specifications. These concerns can involve such product attributes as safety, health or environmental impacts, durability, compatibility, suitability for intended purposes or for stated conditions, and other similar considerations. These issues can all be addressed through product certification.

Third party certification is a conformity assessment process, carried out by a body that is independent of both supplier and customer organisations. It provides confirmation that products and services have met and will continue to meet the requirements of specified standards and other normative documents.

LPCB third party product certification schemes are quality assurance schemes and comprise initial type testing and technical evaluation, assessment and surveillance of the manufacturer's quality system and factory production procedures, regular audit testing, labelling and listing.

Similarly, LPCB schemes for suppliers of services (installers) are also quality assurance schemes comprising a technical assessment of an installer's capability, assessment and surveillance of the installer's quality system and production procedures, regular inspection of completed installations and listing.

Benefits of Third Party Certification

For specifiers, regulators, insurers, manufacturers and installers, the benefits of an LPCB approval are:

For specifiers and regulators:

- Risk reduction - specifying LPCB approved products and services demonstrates due-diligence and best endeavour and mitigates against possible accusations of negligence.
- Avoidance of costly mistakes - you can trust LPCB approved products and services to conform each and every time.
- Time - using Red Book Live to search for and assess products and services can save you time.

For manufacturers and installers:

- Increased global sales - LPCB approval is recognised and specified widely throughout the world. In some territories LPCB approval is a mandatory requirement.
- Added value of the product or service - LPCB approved products and services are recognised as providing added value given their ability to conform each and every time.
- Reduced liability - LPCB approved products and services demonstrate due-diligence which can reduce liability for both you and your customers.

What does LPCB Certification offer?

LPCB certification is carried out against Loss Prevention Standards (LPS's). These LPS's include reference to BS, EN or ISO standards as appropriate. LPCB certification are level 5 schemes as detailed in ISO/ IEC 17067 with the added requirement to have a quality system certificated to ISO 9001.

The technical requirements of LPCB schemes are given in the Loss Prevention Standards (LPSs). These documents are drafted by LPCB technical experts in conjunction with appropriate external experts. They are then peer reviewed by representatives from trade bodies, regulators, insurers, specifiers, manufacturers and other suppliers. Finally these documents are approved for use by the BRE Global Governing Body; the Body that oversees all of the certification activities of BRE Global.

Product schemes comprise:

- Initial type testing and evaluation of product.
- Approval and surveillance of the manufacturer's (or supplier's) quality management system to ISO 9001
- Assessment and surveillance of the manufacturer's (or supplier) factory production control system (FPC).
- Periodic audit testing of the product from either the factory or marketplace.
- Labelling or marking as appropriate.
- Listing on Red Book Live

Installer schemes comprise:

- Technical assessment of the installation contractor's capability.
- Approval and surveillance of the contractor's quality management system to ISO 9001 or assessment against the requirements of the relevant Loss Prevention Standard where ISO 9001 is not appropriate.
- Regular surveillance inspections of on-going installations.
- The issue of Certificates of Conformity by the installer to demonstrate compliance for each installation.
- Listing in the Red Book.

The LPCB Mark - the Mark you can trust

After certification of a product or service the manufacturer or service provider may place the LPCB certification mark, as shown below, on the product, packaging and literature etc.

Where LPCB holds accreditation through the United Kingdom Accreditation Service (UKAS), the certified company may include the UKAS symbol (the Crown and Tick) alongside the LPCB mark for certain applications e.g. promotional literature or material and stationery, as shown below.

(Full details of LPCB accreditation can be found on the UKAS website at www.ukas.com)

Where for reasons of space or cost the use of the above full mark is not practical, then the following simplified mark may be applied directly to the product (for some schemes only). The LPCB scheme rules define how and where the marks can be used.

3 Automatic sprinkler, water spray and deluge systems	1
SECTION 1.1 LPS 1048 approved sprinkler contractors - UK and Ireland	3

*AUTOMATIC SPRINKLER,
WATER SPRAY AND
DELUGE SYSTEMS*

PART 3: AUTOMATIC SPRINKLER, WATER SPRAY AND DELUGE SYSTEMS

INTRODUCTION

The standards used by LPCB for approving and listing sprinkler system components have been developed to ensure that they are suitable for use in systems installed to the LPC Sprinkler Rules incorporating EN 12845.

Many of these components may also be suitable for use in systems designed in accordance with other international and national codes such as NFPA.

To ensure that the systems work, it is recommended that they are designed, installed, commissioned and maintained by contractors who are approved by LPCB to LPS 1048 (for commercial systems) or LPS 1301 (for residential or domestic systems).

Listings in this section include:

Products

- Wet and dry alarm valves for sprinkler systems
- Wet alarm valve stations
- Accelerators and exhausters for dry pipe valves
- Deluge valves and actuators
- Direct reading flow meters
- Multiple jet controls
- Pipe couplings and fittings
- Flexible drops
- Pre-action control systems
- Sprinkler system recycling systems
- Pressure switches
- Sprinkler heads
- Sprinkler bulbs
- Suction tanks for automatic pumps
- Vortex inhibitors
- Water flow alarm switches
- Flow switch testing devices
- Water spray systems
- Fire pumps
- Multi-state fire pumps
- Diesel engines for sprinkler pump sets
- Pipework supports
- Check valves
- Stop valves
- Plastic pipes and fittings
- Metron actuators
- Water motor alarms

Products are approved in accordance with a range of standards, the details of which are given at the front of each section relevant to the product.

Installation and maintenance contractors

Contractors are approved in accordance with:

- *LPS 1048: Requirements for the approval of sprinkler system contractors in the UK and Ireland.*
- *LPS 1148: Requirements for contractors engaged in the design, installation, commissioning and servicing of automatic sprinkler systems (overseas)*
- *LPS 1301: Requirements for the approval of sprinkler installers in the UK and Ireland for residential and domestic sprinkler systems.*

Sprinkler systems are only effective if designed, installed and maintained correctly. The LPS 1048-1 scheme: *Requirements for the approval of Sprinkler Contractors in the UK and Ireland*, ensures that installers are capable of designing, installing and servicing sprinkler systems to acceptable installation standards.

Scheme Structure

There are 4 approval levels for Sprinkler Contractors in the LPS 1048-1 scheme. Figure 1 below shows the Categories of Work that are allowed to be carried out at each approval level in the LPS 1048-1 scheme.

Figure 1		Approval Level			
Categories of Work		1	2	3	4
A	Pre-calculated ordinary hazard systems, installations, extensions and alterations (excluding water supplies)	√	√	√	√
B	Pre-calculated high hazard systems, installations, extensions and alterations (excluding water supplies)	√	√	√	√
C	Town's main water supplies	√	√	√	√
D	Pumped water supplies	√	√	√	√
E	Base build contracts (pre-calculated design principles)		√	√	√
F	Systems, installations, extensions and alterations involving FHC design principles			√	√

Important Note to Specifiers

Specifiers should only use Sprinkler Contractors that are LPS 1048-1 approved to the appropriate level depending on the type of sprinkler work required, refer to the individual company listings for the approval level of Sprinkler Contractors.

Listing of Sprinkler Contractors

LPS 1048-1 Approved Sprinkler Contractors are listed alphabetically, regardless of their approval level.

Continual Assessment

The LPS 1048-1 scheme has over 80 sprinkler contractors that are continually assessed for their continued capability to undertake sprinkler contracts and for their compliance with the requirements of the LPS 1048-1 scheme.

Certificates of Conformity

In order to ensure that a sprinkler system is effective, specifiers should always request an LPS 1048 Certificate of Conformity. An LPS 1048 Certificate of Conformity may only be issued for a sprinkler system, installation, extension or alteration that is in full compliance with the one of the acceptable installation standards.

Any agreed minor deviations to the installation standard will be recorded on the LPS 1048 Certificate of Conformity. An LPS Certificate of Conformity cannot be issued if there is a major deviation to the installation standard. It should be noted that a Sprinkler Contractor's Completion Certificate is **NOT** an LPS 1048 Certificate of Conformity.

An LPS 1048 Certificate of Conformity only remains valid if the sprinkler system, installation, extension or alteration, covered by the certificate, is serviced and maintained in accordance with the original installation standard.

PART 3: SECTION 1.1

LPS 1048 APPROVED SPRINKLER CONTRACTORS - UK AND IRELAND

Supervision

Where an approved Sprinkler Contractor does not meet all the criteria set out in the LPS 1048-1 scheme document to self-certificate any of the Categories of Work allowed under its approval level, it is required to have the Category (ies) of Work that it is not approved to self-certificate supervised by an LPCB approved Supervising Body or the LPCB Supervisory Service.

Supervision involves a review of the design, an inspection of the installed sprinkler protection, and if water supplies are included in the scope of work, witnessing of the water supply proving tests, for compliance with the installation standard. For supervised contracts, the LPS 1048 Certificates of Conformity is issued by an LPCB approved Supervising Body or the LPCB Supervisory Service.

Details of the Categories of Work that each approved Sprinkler Contractor can self-certificate, can be found in the individual company listings.

Financial assessment

The assessment and listing of Sprinkler Contractors in the LPS 1048-1 scheme covers only technical and quality aspects. All other contractual requirements are the responsibility of the parties to the contract.

Service and maintenance

Installers that undertake service and maintenance work are assessed for their capability to carry out such work in accordance with EN 12845 clause 20 and Technical Bulletin 203 of the LPC Rules for Automatic Sprinkler Installations.

A & F Sprinklers Limited

PART 3: SECTION 1.3

LPS 1148 APPROVED SPRINKLER CONTRACTORS - OVERSEAS

LPS 1148 is a new scheme for installers of automatic fire sprinkler systems based overseas. This scheme is open to all Contractors operating anywhere in the World except the UK & Ireland and The Netherlands where LPCB operates different schemes for installers of automatic sprinkler systems.

Scheme Structure

There are 4 approval levels for Sprinkler Contractors in the LPS 1148 scheme. Figure 1 below shows the Categories of Work that are allowed to be carried out at each approval level in the LPS 1148 scheme.

Figure 1

Category of Work		Approval level			
		1	2	3	4
A	Pre-calculated ordinary hazard systems, installations, extensions and alterations (excluding water supplies)	✓	✓	✓	✓
B	Pre-calculated high hazard systems, installations, extensions and alterations (excluding water supplies)	✓	✓	✓	✓
C	Town's main water supplies	✓	✓	✓	✓
D	Pumped water supplies	✓	✓	✓	✓
E	Base build contracts (pre-calculated design principles)		✓	✓	✓
F	Systems, installations, extension and alterations involving FHC design principles			✓	✓

Installation standard

Sprinkler contractors will be assessed for their capability to design, install, test & commission and service (where undertaken) automatic fire sprinkler systems using their national sprinkler standard.

Important note to Specifiers

Specifiers should only use Sprinkler Contractors that are LPS 1148 approved to the appropriate level depending on the type of sprinkler work required, refer to the individual company listings for the approval level of Sprinkler Contractors.

Listing of Sprinkler Contractors

LPS 1148 Approved Sprinkler Contractors are listed alphabetically, regardless of their approval level.

Continual assessment

LPS 1148 approved sprinkler contractors are continually assessed for their continued capability to undertake sprinkler contracts and for their compliance with the requirements of the LPS 1148 scheme.

Certificates of Conformity

In order to ensure that a sprinkler system is effective, specifiers should always request an LPS 1148 Certificate of Conformity. An LPS 1148 Certificate of Conformity may only be issued for a sprinkler system, installation, extension or alteration that is in full compliance with the one of the acceptable installation standards.

Any agreed minor deviations to the installation standard will be recorded on the LPS 1148 Certificate of Conformity. A certificate of conformity cannot be issued if there is a major deviation to the installation standard. It should be noted that a Sprinkler Contractor's Completion Certificate is **NOT** an LPS 1148 Certificate of Conformity.

An LPS 1148 Certificate of Conformity remains valid only if:

1. The sprinkler system user carries out and maintains adequate records of the programme of daily and weekly inspections and checks required by the applicable installation standard, which will also be detailed in the operating and maintenance manual provided by the LPS 1148 Approved Sprinkler contractor, and
2. The sprinkler system is serviced, maintained and inspected strictly in accordance with the applicable installation standard by an LPS 1148 Approved Sprinkler Contractor, and
3. All subsequent repairs, alterations or additions to the sprinkler system are carried out by an LPS 1148 listed Sprinkler Contractors whose level of approval in the LPS 1148 scheme is appropriate to the scope of work carried out.

Supervision

Where an approved Sprinkler Contractor does not meet all the criteria set out in the LPS 1148 scheme document to self-certify any of the Categories of Work allowed under its approval level, it is required to have the Category(ies) of Work that it is not approved to self-certify supervised by the LPCB Supervisory Service.

Supervision involves a review of the design, an inspection of the installed sprinkler protection, and if water supplies are included in the scope of work, witnessing of the water supply proving tests, for compliance with the nominated installation standard. LPS 1148 Certificates of Conformity are then issued by the LPCB Supervisory Service.

Details of the Categories of Work that each approved Sprinkler Contractor can self-certify, can be found in the individual company listings.

Service and maintenance

Installers that undertake service and maintenance work are assessed for their capability to carry out such work in accordance with the nominated installation standard.

Financial assessment

The assessment and listing of Sprinkler Contractors in the LPS 1148 scheme covers only technical and quality aspects. All other contractual requirements are the responsibility of the parties to the contract.

Alberta Fire & Security Equipment Limited

San Gwakkın Road, Mriehel, BKR 3000, Malta

Tel: +356 21 443538 • Fax: +356 21 484077

Certificate No. ASCO-001 to LPS 1148

Approval Level 4

Approved to self-certify all Categories of Work
No supervision required

PART 3: SECTION 2

LPS 1301 APPROVED SPRINKLER INSTALLERS (RESIDENTIAL AND DOMESTIC)

Automatic sprinklers can be installed in residential and domestic premises to safeguard life, property and the environment yet two thirds of fire fatalities occur in unsprinklered residential and multi-occupancy properties such as care homes and blocks of flats.

Equipment designs and system configurations are constantly evolving. In order to ensure adequate protection, sprinkler system installers need and appropriate technical competency in both design and installation.

LPCB has developed LPS 1301 *Requirements for the approval of Sprinkler Installers in the UK and Ireland for Residential and Domestic Sprinkler Systems*. This scheme was produced with the assistance of installers, fire brigades, local government, insurers and end users.

The key requirements of the scheme are that:-

- The company must be totally responsible for all aspects of the project, including the work of any sub-contractors
- The company has designated permanent employees including a 'Design Supervisor' and an 'Installation Supervisor' who are suitably trained and experienced in their roles
- The company maintains adequate records of all aspects of its activities.

Firms approved under this scheme are audited every 6 months looking at their compliance to LPS 1301 including visits to site.

Ecotect Engineering Limited

Technology House, 3A Bentwood Road, Haslingden, Rossendale, Lancashire BB4 5HH, United Kingdom

Certificate No. ARI-001 to LPS 1301

PART 3: SECTION 3.1

WET AND DRY ALARM VALVES FOR SPRINKLER SYSTEMS

This section lists products approved in accordance with:

- EN12259-2 *Fixed firefighting systems. Components for sprinkler and water spray systems. Wet alarm valve assemblies*
- EN12259-3 *Fixed firefighting systems. Components for sprinkler and water spray systems. Dry alarm valve assemblies*
- LPCB Schedule of requirements

It is strongly recommended that all alarm valves, dry-pipe valves and back-pressure valves be the subject of a maintenance contract, satisfying the requirements of the *LPC Rules for Automatic Sprinkler Installations*.

The nominal orifice size of valves listed is given in millimetres.

The products shall be installed and maintained in accordance with the manufacturer's instructions.

Reliable Dry Alarm Valve (9,10,11,12,14)	DDX	65 (73.0)	034n/05
	DDX	65 (76.1)	034n/06
	DDX	80	034n/07

Notes:

- 1) With flanged inlet and flanged outlet.
- 2) With grooved inlet and grooved outlet.
- 3) With flanged inlet and flanged or grooved outlet.
- 4) With threaded inlet and outlet.
- 5) Vertical or horizontal.
- 6) Vertical.
- 7) Maximum working pressure of 12 bar.
- 8) Maximum working pressure of 21 bar.
- 9) Maximum rated working pressure 20.7 bar.
- 10) With groove inlet and outlet.

PART 3: SECTION 3.1

WET AND DRY ALARM VALVES FOR SPRINKLER SYSTEMS

- 11) Vertical orientation as indicated only.
- 12) Approved with or without "model B1" quick opening device (LPCB ref 034c/01).
- 13) Refer to manufacturers instructions "Bulletins 356-B & 357-B"
- 14) Refer to manufacturers instruction "Bulletin 338"

Certificate No: 034s to EN12259 Part 3

Model EX Dry Pipe Alarm Valves

Model 768 and 768N Dry Alarm Valve

Product Name	Model	Sizes (mm)	LPCB Ref. No.
Series 768 Dry Alarm Valve	Series 768	40, 50, 65, 80, 100, 150 & 200	104c/01
Series 768N Dry Alarm Valve	Series 768N	40, 50, 65, 80, 100, 150 & 200	104c/02

Notes:

- 1) Maximum working pressure: 20 bar.
- 2) Approved for use with and without Victaulic Series 746 LPA accelerator.
- 3) Approved with grooved inlet and outlet only.
- 4) Approved in vertical orientation only.
- 5) Installations containing Series 768 and Series 768N valve shall be maintained under servicing contracts with the manufacturer, or LPS 1048 and LPS 1050 firms experienced in the installation and servicing of this valve.

Certificate No: 104e to EN 12259-2

Series 751

Product Name	Model	Sizes	LPCB Ref. No.
Series 751 Wet Alarm Valve	Series 751	80, 100, 150 & 200	104e/01

Notes:

- 1) Maximum working pressure: 16 bar
- 2) Approved for use with and without Series 752 retard chamber.
- 3) Approved with grooved inlet and outlet only.
- 4) Approved in vertical orientation only.
- 5) 150mm nominal diameter valve approved in 165.1mm and 168.3mm outside diameters.
- 6) Installations containing Series 751 valve shall be maintained under servicing contracts with the manufacturer, or LPS 1048 and LPS 1050 firms experienced in the installation and servicing of this valve.

Certificate No: 104g

Series 764

Product Name	Model	Sizes (mm)	LPCB Ref. No.
Series 764 Alternate Valve	Series 764	40, 50, 65, 80, 100, 150 & 200	104g/01

Notes:

- 1) Maximum working pressure: 16 bar
- 2) Approved for use with and without Victaulic Series 746 LPA accelerator.
- 3) Approved for use with and without Series 752 retard chamber.
- 4) 150mm nominal diameter valve approved in 165.1mm and 168.3mm outside diameters.
- 5) Approved with grooved inlet and outlet only.
- 6) Approved in vertical orientation only
- 7) Installations containing Series 764 valve shall be installed, commissioned and serviced under contracts with the manufacturer, or LPS 1048 and LPS 1050 firms experienced in the installation and servicing of this valve.

This section lists products approved in accordance with:

	100		500-3500	Groove	464a/08
	150 (165.1mm)		900-7900	Groove	464a/09
	150 (168.3mm)		900-7900	Groove	464a/22
			2000-15000	Groove	464a/10

These meters have been approved for installation with the gauge glass in the vertical position. There must be at least five diameters of straight pipe upstream and downstream of the orifice plate. The isolating valves on the pressure tapings must be kept closed when the meter is not being used. A spare gauge glass must be provided and located in the cabinet containing the stock of replacement sprinklers.

Certificate No: 464a

Notes:

- 1) These meters are provided with portable bypass meters (contain measuring tubes) that are connected directly to the flowmeter body at the time of operation. After measurements are taken the bypass meters are to be unscrewed, emptied and put back into packaging, then the open orifice must be sealed pressure tight with the caps.
- 2) These meters have been approved for installation with the bypass meter in the vertical position.
- 3) Turbo-Lux 3 meters must be installed and maintained in accordance with manufacturers instructions '©Mecon GmbH 11/2016 OI_FO Turbo-Lux 3'

	OHIIIS	80	1800 - 2100	55.20	007e/04

These measuring devices are designed to be fitted directly on the upstream side, to straight pipes or into elbow fittings or globe valves or their hydraulic equivalent. The downstream flow loss may be zero in all but the case of the OHI measuring device which requires a minimum loss of 0.02 bar at a flow of 375 dm³/min. The maximum downstream flow loss shall not exceed 0.3 bar for any of the measuring devices with the following respective flow rates:

OHI 540dm³/min, OHII 1000dm³/min, OHIII 1350dm³/min, OHIIIS 2100dm³/min

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Multiple Jet Controls for use under the *LPC Rules for Automatic Sprinkler Installations* have been approved to a schedule of requirements developed by LPCB. The products shall be installed and maintained in accordance with the manufacturer's instructions.

PIPE COUPLINGS AND FITTINGS

Pipe Couplings (GRUVLOK)

Product Name	Pipe Outside Diameter (mm)	Maximum Working Pressure (bar)	LPCB Ref. No.
90° Elbow - Fig 7050	33.7, 42.4, 48.3, 60.3, 76.1, 88.9, 108 ⁽¹⁾ , 114.3, 133 ⁽¹⁾ , 159 ⁽¹⁾ , 165.1, 168.3, 219.1	20	119a/07
45° Elbow - Fig 7051	33.7, 42.4, 48.3, 60.3, 76.1, 88.9, 108 ⁽¹⁾ , 114.3, 133 ⁽¹⁾ , 159 ⁽¹⁾ , 165.1, 168.3, 219.1	20	119a/08
Tee - Fig 7060	33.7, 42.4, 48.3, 60.3, 76.1, 88.9, 108 ⁽¹⁾ , 114.3, 133 ⁽¹⁾ , 159 ⁽¹⁾ , 165.1, 168.3, 219.1	20	119a/09
Blank Cap - Fig 7074	33.7, 42.4, 48.3, 60.3, 76.1, 88.9, 108 ⁽¹⁾ , 114.3, 133 ⁽¹⁾ , 159 ⁽¹⁾ , 165.1, 168.3, 219.1	20	119a/10
90° Elbow - Fig 7050E//SPF E1	42.4, 48.3, 60.3, 76.1, 88.9, 114.3, 139.7, 165.1, 168.3, 219.1, 273.0, 323.9	20	519a/12
45° Elbow - Fig 7051E//SPF E2	42.4, 48.3, 60.3, 76.1, 88.9, 114.3, 139.7, 165.1, 168.3, 219.1, 273.0, 323.9	20	519a/13
Tee - Fig 7060E//SPF T1	42.4, 48.3, 60.3, 76.1, 88.9, 114.3, 139.7, 165.1, 168.3, 219.1, 273.0, 323.9	20	519a/14
Cap - Fig 7074E//SPF K1	42.4, 48.3, 60.3, 76.1, 88.9, 114.3, 139.7, 165.1, 168.3, 219.1, 273.0, 323.9	20	519a/08
Short pattern 90° Elbow - Fig 7450E//SPF SE1	60.3, 76.1, 88.9, 114.3, 139.7, 165.1, 168.3, 219.1	20	519a/20
Short pattern Tee - Fig 7460E//SPF ST1	60.3, 76.1, 88.9, 114.3, 139.7, 165.1, 168.3,	20	519a/21

Note:

All couplings and fittings to be installed in accordance with the manufacturer's pipe preparation and installation instructions.

Notes:

All above products to be installed in accordance with Minimax Installation Instructions MX-INS900_EN, REV E or equivalent German version MX-INS900_DE, REV F.

Shurjoint fittings, (LPCB Ref. No. 448a), may be used with Minimax couplings up to DN250. Minimax fittings may be used with Shurjoint couplings, but for sizes DN200 and above only Shurjoint rigid couplings may be used.

In all cases the bolt tightening torque specified by the manufacturer for the coupling type fitted in any assembly must be used.

Live Tap Mechanical Tees

Product Name	Nominal Size (m)	Pipe Ends	Gasket Type	Maximum Working Pressure (bar)	LPCB Ref. No.
Model LT-KD-002 (Kwik-Drain) (Note 2)	50 x 25.4	T	EPDM	12	060c/01
Model LT-KD-002 (Kwik Drain) (Note 2)	65 x 25.4	T	EPDM	12	
	80 x 25.4	T	EPDM	12	
	100 x 25.4	T	EPDM	12	
	150 x 25.4	T	EPDM	12	
Model LT-KD-50-002 (Kwik-Drain 50mm outlet) (Note 2)	80 x 50.8	T	EPDM	12	060c/02
	100 x 50.8	T	EPDM	12	
	150 x 50.8	T	EPDM	12	
Model LT-KD-SA-001 (Kwik-Drain S.A.) (Note 2)	50 x 25.4	T	EPDM	12	
	65 x 25.4	T	EPDM	12	
	80 x 25.4	T	EPDM	12	
	100 x 25.4	T	EPDM	12	
	150 x 25.4	T	EPDM	12	
Model LT-NDT(50)-002 (No-Drain-T) (Note 3 & 4)	50 x 32	T	EPDM	12	060c/03
	65 x 40	T	EPDM	12	
Model LT-NDT (50)-002 (No Drain-T) (Note 3 & 4)	80 x 50.8	T	EPDM	12	060c/06
	100 x 50.8	T	EPDM	12	
	150 x 50.8	T	EPDM	12	
Model LT-KC(15-32)-002 (Kwik-Clamp) (Note 2)	32 x 15	T	EPDM	12	
Model LT-KC(15-40)-002 (Kwik-Clamp) (Note 2)	40 x 15	T	EPDM	12	
Model LT-KC(15-50)-002 (Kwik-Clamp) (Note 2)	50 x 15	T	EPDM	12	
Model LT-KV-SA-001 (Kwik-Vent S.A.) (Note 2)	32 x 15	T	EPDM	12	060c/06
	40 x 15	T	EPDM	12	
	50 x 15	T	EPDM	12	
Model LT-C-100-80 (No-Drain-T) (Notes 1, 3 & 4)	100 x 80	G	EPDM	12	060d/01

Notes:

- 1) LPCB approval is limited to pipe fittings (mechanical tees) to LPS1219. LPCB approval excludes all ancillary equipment for use with LiveTap products.

PART 3: SECTION 8.1

PIPE COUPLINGS AND FITTINGS

- 2) Sprinkler heads must not be connected to these outlets.
- 3) These outlets are suitable for sprinkler head connections.
- 4) This fitting must only be installed in the orientation specified by the manufacturer in document WIUPD035 and not in a way that could cause fitting rotation around the branch pipe in the event of a hanger failure on the outlet pipe.

Notes:

All these products to be installed in accordance with the relevant Victaulic Instructions.

- 1) These sizes are not suitable for installations that requires BS 1387 pipework due to the sizes not being included in that standard.
- 2) A bolt tightening torque of 125 ft lbf (170Nm) is required for these sizes.
- 3) These products are approved to the above stated maximum working pressures with zinc-electroplated bolts and nuts and also approved to 25 bar working pressure with hot dipped galvanized bolts and nuts.

Certificate No: 104-1a

Certificate No: 078a

All couplings and fittings to be installed in accordance with the Victaulic Field Assembly and Installation Instruction handbook.

Certificate No: 104-1a to LPS 1219: Issue 3.1

Installation Ready Fittings

Product Name	Model No.	Pipe Outside Diameter (mm)	Gasket Type	Maximum Working Pressure (bar)	LPCB Ref. No.
90° Elbow	101	42.4 ⁽¹⁾ , 48.3 ⁽¹⁾ , 60.3 ⁽²⁾ , 73.0 ⁽²⁾ , 76.1 ⁽²⁾	EPDM	25	104-1a/38
Tee	102	42.4 ⁽¹⁾ , 48.3 ⁽¹⁾ , 60.3 ⁽²⁾ , 73.0 ⁽²⁾ , 76.1 ⁽²⁾	EPDM	25	
45° Elbow	103	42.4 ⁽¹⁾ , 48.3 ⁽¹⁾ , 60.3 ⁽²⁾ , 73.0 ⁽²⁾ , 76.1 ⁽²⁾	EPDM	25	

Above items to be installed in accordance with Victaulic Instructions I-102_1 REV_B

- (1) A bolt torque of 60 ft lbf (81 Nm) is required for this size
- (2) A bolt torque of 70 ft lbf (95 Nm) is required for this size

PART 3: SECTION 8.2

FLEXIBLE DROPS

This section lists products approved in accordance with:

- LPS 1261 *Requirements for testing flexible hoses for sprinkler systems.*

Flexible pipes may be used in different ways within a sprinkler system. For example some products are suitable for use behind ceiling grids whilst others are suitable for connecting supplies to storage racks. The user should contact the manufacturer to ensure they specify the correct type.

A wide range of flexible drop pipe lengths are available in these listings. The end users should ensure the selection of appropriate product with due regard to the installation codes and rules applicable to the territories in which these products are being installed.

Certificate No: 1298a to LPS 1261: Issue 02 (Draft)

Daejin Sanup Co. Genie-Systems DJ25UB – 25 mm Unbraided Flexible Sprinkler Hose

Product Name	Length (mm)	Nominal Size / Connection Supply	Nominal Size / Connection Outlet	Maximum Working Pressure (bar)	LPCB Ref. No.
DJ25UB-700	700	1 NPT/PT external thread	½" NPT/PT internal thread	16	1298a/01
DJ25UB-1000	1000	1 NPT/PT external thread	¾" NPT/PT internal thread ½" NPT/PT internal thread	16	
DJ25UB-1200	1200	1 NPT/PT external thread	¾" NPT/PT internal thread ½" NPT/PT internal thread	16	
DJ25UB-1500	1500	1 NPT/PT external thread	¾" NPT/PT internal thread ½" NPT/PT internal thread	16	
DJ25UB-1800	1800	1 NPT/PT external thread	¾" NPT/PT internal thread ½" NPT/PT internal thread	16	

These products have been approved as a Type 2 hose of moderate flexibility in accordance with LPS 1261. These may be used in applications where little or no differential movement between the two ends is expected after installation (e.g. supply to single sprinklers in suspended ceilings).

- Daejin Sanup Co. Genie-Systems DJ25UB sprinkler hose connections are approved for use in the following applications:

Assembly length (mm)	Pre-calculated		Fully hydraulically calculated
	Town's mains	Pumped	
Up to 700*	Yes	Yes	Yes
Up to 1000**	Yes	Yes	Yes
Up to 1500**	No	Yes	Yes
Up to 1800***	No	Yes	Yes

All pipework supplying Daejin Sanup Co. sprinkler connection assemblies in pre-calculated systems shall be sized as distribution mains

*up to 1 x 90° bends

**up to 2 x 90° bends

***up to 3 x 90° bends

- 2) In suspended ceilings Daejin Sanup Co. DJ25UB sprinkler connection must be installed in accordance with the Daejin Sanup Co. Installation Manuals IM-L-01(R.2) and IM-L-02(R.2) dated 02.06.2015.
- 3) In suspended ceilings the outlet reducer must be secured to the ceiling support system with brackets supplied. For other applications the installer must supply brackets to ensure sprinkler is secure.

These products have been approved as a Type 2 hose of moderate flexibility in accordance with LPS 1261. These may be used in applications where little or no differential movement between the two ends is expected after installation (e.g. supply to single sprinklers in suspended ceilings)

(1) Dong-A sprinkler connections are approved for use in the following applications:

Assembly length (mm)	Pre-calculated		Fully hydraulically calculated
	Town's mains	Pumped	
Up to 1220*	Yes	Yes	Yes
Up to 1880**	No	Yes	Yes
Up to 3220	No	No	Yes

All pipe work supplying Dong-A flexible sprinkler connections assemblies in pre-calculated systems shall be sized as Distribution mains

* For use with a 90 degree sprinkler reducer, this length is to 1000 mm

** For use with a 90 degree sprinkler reducer, this length is reduced to 1540 mm

The above applications apply to Dong-A flexible sprinkler connections with up to 3 x 90' bends and either straight or 90' reducers.

(2) In suspended ceilings Dong-A flexible sprinkler connections must be installed in accordance with Installation Instructions DASP000501.

(3) In suspended ceilings, outlet reducer must be secured to the ceiling support system with brackets supplied. For other applications the installer must supply brackets to ensure sprinkler is secure.

(4) For special applications the outlet is 1" Nipple for connection to normal standard pipe fittings, installer must supply & install brackets to ensure that the sprinkler is secure.

These products have been approved as a Type 2 hose of moderate flexibility in accordance with LPS 1261. These may be used in applications where little or no differential movement between the two ends is expected after installation (e.g. supply to single sprinklers in suspended ceilings)

1 Flexhead flexible sprinkler connections are approved for use in the following applications:

Assembly length (mm)	Pre-calculated		Fully hydraulically calculated
	Town's	Pumped	
600	Yes	Yes	Yes
900	Yes	Yes	Yes
1200	Yes	Yes	Yes
1500	Yes	Yes	Yes
1800	Yes	Yes	Yes

All pipework supplying Flexhead flexible sprinkler connection assemblies in pre-calculated systems shall be sized as distribution mains.

PART 3: SECTION 8.2

FLEXIBLE DROPS

The above applications apply to Flexhead Standard and Flexhead H with up to three bends of up to 90° each.

2. In a suspended ceiling Flexhead flexible sprinkler connections must be installed in accordance with the Flexhead Installation Guide, designated FlexLPCB07.
3. In suspended ceilings, outlet reducer must be secured to the ceiling support system with brackets supplied. For other applications the installer must supply brackets to ensure sprinkler is secure.

These products have been approved as a Type 2 hose of moderate flexibility in accordance with LPS 1261. These may be used in applications where little or no differential movement between the two ends is expected after installation (e.g. supply to single sprinklers in suspended ceilings)

1) Rapidrop® flexible sprinkler connections are approved for use in the following applications:

Assembly length (mm)	Pre-calculated		Fully hydraulically calculated
	Town's mains	Pumped	
Up to 1220*	Yes	Yes	Yes
Up to 1880**	No	Yes	Yes
Up to 3220	No	No	Yes

All pipework supplying Rapidrop® flexible sprinkler connections assemblies in pre-calculated systems shall be sized as distribution mains

* For use with a 90 degree sprinkler reducer, this length is to 1000 mm.

** For use with a 90 degree sprinkler reducer, this length is reduced to 1540 mm.

The above applications apply to Rapidrop® flexible sprinkler connections with up to 3 x 90° bends and either straight or 90° reducers.

- 2) In suspended ceilings Rapidrop® flexible sprinkler connections must be installed in accordance with Installation Instructions SPT000707.
- 3) In suspended ceilings, outlet reducer must be secured to the ceiling support system with brackets supplied. For other applications the installer must supply brackets to ensure sprinkler is secure.
- 4) For special applications the outlet is 1" Nipple for connection to normal standard pipe fittings, installer must supply & install brackets to ensure that the sprinkler is secure.

These products have been approved as a Type 2 hose of moderate flexibility in accordance with LPS 1261. These may be used in applications where little or no differential movement between the two ends is expected after installation (e.g. supply to single sprinklers in suspended ceilings).

- 1) RASCOFLEX RFXXXU (unbraided) sprinkler hose connections are approved for use in the following applications:

Assembly length (mm)	Pre-calculated		Fully hydraulically calculated
	Town's mains	Pumped	
Up to 1000*	Yes	Yes	Yes
Up to 1200**	Yes	Yes	Yes
Up to 1500**	No	Yes	Yes
Up to 1800***	No	Yes	Yes

RASCOFLEX RFXXXB (braided) sprinkler hose connections are approved for use in the following applications:

Assembly length (mm)	Pre-calculated		Fully hydraulically calculated
	Town's mains	Pumped	
Up to 1000*	Yes	Yes	Yes
Up to 1200**	Yes	Yes	Yes
Up to 1500**	Yes	Yes	Yes
Up to 1800***	Yes	Yes	Yes

All pipework supplying RASCOFLEX sprinkler connection assemblies in pre-calculated systems shall be sized as distribution mains

*up to 1 x 90° bends, with or without a 90° elbow reducer

**up to 2 x 90° bends, with or without a 90° elbow reducer

***up to 3 x 90° bends, with or without a 90° elbow reducer

- 2) In suspended ceilings RASCOFLEX sprinkler connection must be installed in accordance with the RASCOFLEX installation instructions RF Inst. 1.0 dated 21.10.14.
- 3) In suspended ceilings the outlet reducer must be secured to the ceiling support system with brackets supplied. For other applications the installer must supply brackets to ensure sprinkler is secure.

These products have been approved as a Type 2 hose of moderate flexibility in accordance with LPS 1261. These may be used in applications where little or no differential movement between the two ends is expected after installation (e.g. supply to single sprinklers in suspended ceilings)

1. Tyco Fastflex flexible sprinkler connections are approved for use in the following applications:

Assembly length (mm)	Pre-calculated		
	Town's main	Pumped	Fully Hydraulically calculated
700	Up to 2 x 90° bends	Up to 2 x 90° bends	Up to 2 x 90° bends
Up to 1200	No	Up to 2 x 90° bends	Up to 2 x 90° bends
Up to 1500	No	No	Up to 2 x 90° bends
Up to 3700	No	No	Up to 3 x 90° bends

All pipework supplying Fastflex flexible sprinkler connection assemblies in pre-calculated systems shall be sized as distribution mains.

The above restrictions apply to Fastflex which includes a sprinkler reducer. Straight lengths can be used with a 90° outlet.

2. In suspended ceilings Fastflex flexible sprinkler connections must be installed in accordance with Fastflex Installation Guide Rev 1.

PART 3: SECTION 8.2

FLEXIBLE DROPS

- In suspended ceilings, outlet reducer must be secured to the ceiling support system with brackets supplied. For other applications the installer must supply brackets to ensure sprinkler is secure.

		1¼" BSPT/NPT external thread	¾" BSPT/NPT internal thread		

These products have been approved as a Type 2 hose of moderate flexibility in accordance with LPS 1261. These may be used in applications where little or no differential movement between the two ends is expected after installation (e.g. supply to single sprinklers in suspended ceilings).

- 1) Youngjin YJ28-S (unbraided) sprinkler hose connections are approved for use in the following applications:

Assembly length (mm)	Pre-calculated		Fully hydraulically calculated
	Town's mains	Pumped	
Up to 1000*	Yes	Yes	Yes
Up to 1200**	Yes	Yes	Yes
Up to 1500**	No	Yes	Yes
Up to 1800***	No	Yes	Yes

Youngjin YJ28-SB (braided) sprinkler hose connections are approved for use in the following applications:

Assembly length (mm)	Pre-calculated		Fully hydraulically calculated
	Town's mains	Pumped	
Up to 1000*	Yes	Yes	Yes
Up to 1200**	Yes	Yes	Yes
Up to 1500**	Yes	Yes	Yes
Up to 1800***	Yes	Yes	Yes

All pipework supplying Youngjin sprinkler connection assemblies in pre-calculated systems shall be sized as distribution mains

*up to 1 x 90° bends, with or without a 90° elbow reducer

**up to 2 x 90° bends, with or without a 90° elbow reducer

***up to 3 x 90° bends, with or without a 90° elbow reducer

- 2) In suspended ceilings Youngjin YJ28 sprinkler connection must be installed in accordance with the Youngjin installation instructions MNL_SP00 dated 10/20/2014.
- 3) In suspended ceilings the outlet reducer must be secured to the ceiling support system with brackets supplied. For other applications the installer must supply brackets to ensure sprinkler is secure.

PART 3: SECTION 8.3

LIGHTWEIGHT PIPEWORK SYSTEMS

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Lightweight Pipework Systems listed below are considered acceptable for use in installations conforming to the *LPC Rules for Automatic Sprinkler Installations*. The products shall be installed and maintained in accordance with the manufacturer's instructions.

Cap	22, 28, 35, 42, 54	1031a/24

PART 3: SECTION 8.3

LIGHTWEIGHT PIPEWORK SYSTEMS

Notes

1. The above Geberit Press-fit pipework and fittings are to be installed using the Geberit Mapress ECO301 and HCPS pressing tools only, in accordance with the Geberit Installation Instructions . These tools shall be serviced and maintained in accordance with manufacturers' stated guidelines.
2. Geberit Press-fit pipework and fittings may only be installed by LPCB approved or registered contractors who have undergone adequate training by the manufacturer.
3. Geberit Press-fit pipework and fittings shall be installed in accordance with the Geberit Installation Instructions, Issue 1. August 2011.
4. Geberit Press-fit pipework and fittings shall be installed and maintained in conformance with the LPC Rules for Automatic Sprinkler Installations.
5. The use of Geberit Press-fit pipework and fittings shall be recorded on LPS1048 certificates of conformity.
6. Where a Geberit Reducer is installed, a pipe hanger shall be used adjacent to the reducer on the larger pipe.
7. Where Geberit system pipework is connected to sprinklers in suspended ceilings using flexible drops, only LPCB Approved flexible drops shall be used.
8. Geberit Press-fit pipework and fittings are not compatible with lightweight piping systems from other manufacturers.

Certificate No: 1031b to TS1599 v5

Geberit Mapress Press-Fit Lightweight Stainless Steel Sprinkler Pipework System

Product Name	Size / mm	LPCB Ref. No.
Pipe	22, 28, 35, 42, 54, 76.1, 88.9, 108	1031b/01
Coupling	22, 28, 35, 42, 54, 76.1, 88.9, 108	1031b/02

Adaptor union with female thread, nut made of brass	22x3/4", 22x1", 28x1", 35x1 1/4", 42x 1 1/2", 54x2"	1031b/18
Adaptor union with female thread, nut made of stainless steel	22x3/4", 22x1", 28x1", 35x1 1/4", 42x1 1/2", 54x2"	1031b/19
Elbow adaptor 90° with male thread	22x3/4", 28x1", 35x1 1/4", 42x1 1/2", 54x2"	1031b/20
Elbow adaptor 90° with female thread	22x3/4", 28x1", 35x1 1/4"	1031b/21
Straight union with press fittings on both ends	22, 28, 35, 42, 54	1031b/22
Flange PN 10 / 16 with pressing socket	22, 28, 35, 42, 54, 76.1, 88.9, 108	1031b/23
Cap	22, 28, 35, 42, 54	1031b/24

Notes

1. The above Geberit Press-fit pipework and fittings are to be installed using the Geberit Mapress ECO301 and HCPS pressing tools only, in accordance with the Geberit Installation Instructions . These tools shall be serviced and maintained in accordance with manufacturers' stated guidelines.

PART 3: SECTION 8.3

LIGHTWEIGHT PIPEWORK SYSTEMS

2. Geberit Press-fit pipework and fittings may only be installed by LPCB approved or registered contractors who have undergone adequate training by the manufacturer.
3. Geberit Press-fit pipework and fittings shall be installed in accordance with the Geberit Installation Instructions, Issue 1. August 2011.
4. Geberit Press-fit pipework and fittings shall be installed and maintained in conformance with the LPC Rules for Automatic Sprinkler Installations.
5. The use of Geberit Press-fit pipework and fittings shall be recorded on LPS1048 certificates of conformity.
6. Where a Geberit Reducer is installed, a pipe hanger shall be used adjacent to the reducer on the larger pipe.
7. Where Geberit system pipework is connected to sprinklers in suspended ceilings using flexible drops, only LPCB Approved flexible drops shall be used.
8. Geberit Press-fit pipework and fittings are not compatible with lightweight piping systems from other manufacturers.

G48 Straight connector (Press x grooved)	28x33.7, 35x42.4, 42x48.3, 54x60.3	169f/22
G50 Stop end (1 x press)	22, 28, 35, 42, 54	169f/23

Notes

1. The above Grinnell G-Press pipework and fittings are to be installed using the Novopress pressing tool in accordance with the Grinnell G-Press User Manual. The tools shall be serviced and maintained in accordance with the manufacturer's stated guidelines.

PART 3: SECTION 8.3

LIGHTWEIGHT PIPEWORK SYSTEMS

2. Grinnell G-Press pipework and fittings may only be installed by LPCB Approved Sprinkler Contractors who have undergone adequate training by the manufacturer.
3. Grinnell G-Press pipework and fittings shall be installed in accordance with the Grinnell G-Press user Manual: Issue TYCENPRESS-10/11.
4. Grinnell G-Press pipework and fittings shall be installed and maintained in conformance with the LPC Rules for Automatic Sprinkler Installations.
5. The use of Grinnell G-Press Sprinkler System pipework and fittings shall be recorded on LPS1048 certificates of conformity.
6. Where a Grinnell Reducer is installed, a pipe hanger shall be used adjacent to the reducer on the larger pipe.
7. Where Grinnell system pipework is connected to sprinklers in suspended ceilings, only LPCB Approved flexible drops shall be used.
8. Grinnell G-Press pipework and fittings are not compatible with lightweight piping systems from other manufacturers.

Certificate No: 1033a to TS1599: Issue draft 5

VSH XPress Lightweight Galvanized Steel Pipework System

Product Name	Description	Size/mm	LPCB Ref. No.
C 1461	Galvanised tube	22, 28, 35, 42, 54	1033a/01
C 1401	Straight Coupling (2 x Press)	22, 28, 35, 42, 54	1033a/02
C 1403	Slip Coupling (2 x Press)	22, 28, 35, 42, 54	1033a/03
C 1408	90° Elbow (2 x Press)	22, 28, 35, 42, 54	1033a/04
C 1411	90° Elbow (Press x plain end)	22, 28, 35, 42, 54	1033a/05
C 1413	45° Elbow (2 x Press)	22, 28, 35, 42, 54	1033a/06
C 1412	45° Elbow (Press x plain end)	22, 28, 35, 42, 54	1033a/07
C 1425	90° Bend (2 x plain end)	22, 28, 35, 42, 54	1033a/08
C 1417	Cross over (2 x plain end)	22, 28	1033a/09
C 1414	Tee equal (3 x Press)	22, 28, 35, 42, 54	1033a/10
C 1415	Tee reduced (3 x Press)	22x28x22, 28x22x28, 35x22x35, 35x28x35, 42x22x42, 42x28x42, 42x35x42, 54x22x54, 54x28x54, 54x35x54, 54x42x54	1033a/11
C 1418	Tee threaded (press x fem. thread x press)	22x1/2"x22, 22x3/4"x22, 28x1/2"x28, 28x3/4"x28, 28x1"x28, 35x1/2"x35, 35x3/4"x35, 35x1x35, 42x1/2"x42, 42x3/4"x42, 42x1"x42, 54x1/2"x54, 54x3/4"x54, 54x1"x54	1033a/12
C 1407	Reducer (Plain end x Press)	28x22, 35x22, 35x28, 42x28, 42x35, 54x35, 54x42	1033a/13
C 1439	Reducer (2 x Press)	28x22	1033a/14
C 1433	Straight connector (plain end x female thread)	22x1/2", 22x3/4"	1033a/15
C 1402	Straight connector (press x female thread)	22x1/2", 22x3/4", 28x1/2", 28x3/4", 28x1", 35x1/2", 35x3/4", 35x1", 35x1/4", 42x1/2", 54x2"	1033a/16
C 1405	Straight connector (press x male thread)	22x1/2", 22x3/4", 22x1", 28 x 3/4", 28x1", 35x1", 35x1/4", 42x1/2", 54x2"	1033a/17
C 1435	Straight union (Press x male thread)	22x3/4", 28x1", 35x1/4", 42x1/2", 54x2"	1033a/18
C 1428	90° Angle adaptor (Press x male thread)	22x3/4"	1033a/19
C 1430	90° Elbow (Press x male thread)	22x3/4", 28x1", 35x1/4", 42x1/2", 54x2",	1033a/20
C 1438	90° Elbow (Press x female thread)	22x1/2", 22x3/4", 28x1/2", 28x3/4", 28x1", 35x1/2", 35x3/4", 35x1"	1033a/21
C 1442	Transition connector (press x grooved)	28x33.7, 35x42.4, 42x48.3, 54x60.3	1033a/22
C 1429	Stop end (1 x press)	22, 28, 35, 42, 54	1033a/23
C 1443	Slip coupling (press x female thread)	22x1/2", 22x3/4", 28x1/2", 28x3/4"	1033a/24
C 1409	Angle adaptor (press x female thread)	22x1/2", 28x1/2", 35x1/2"	1033a/25

PART 3: SECTION 8.3
LIGHTWEIGHT PIPEWORK SYSTEMS

Product Name	Description	Size/mm	LPCB Ref. No.
C 1444	Straight union (press x female thread)	22x ³ / ₄ ", 28x1", 35x1 ¹ / ₄ ", 42x1 ¹ / ₂ ", 54x2"	1033a/26
C 1446	Coupling with nut (press x female thread)	22, 28, 35, 42, 54	1033a/27

Notes:

- The above VSH XPress pipework and fittings are to be installed using the Novopress ECO301, ACO201, ACO202, ECO201, ECO202, EFP2, EFP202 and Klauke UAP2 pressing tools in accordance with the VSH User Manual. These tools shall be serviced and maintained in accordance with the manufacturer's stated guidelines.
- VSH XPress pipework and fittings may only be installed by LPCB approved or registered contractors who have undergone adequate training by the manufacturer.
- VSH XPress pipework and fittings shall be installed in accordance with the VSH User Manual: XPress Sprinkler EN-12-1.0.
- VSH XPress pipework and fittings shall be installed and maintained in conformance with the LPC Rules for Automatic Sprinkler Installations.
- The use of VSH XPress Sprinkler System pipework and fittings shall be recorded on LPS1048 certificates of conformity.
- Where a VSH Reducer is installed, a pipe hanger shall be used adjacent to the reducer on the larger pipe.
- Where VSH system pipework is connected to sprinklers in suspended ceilings, only LPCB Approved flexible drops shall be used.
- VSH XPress pipework and fittings are not compatible with lightweight piping systems from other manufacturers.

Certificate No: 1033b to TS1599: Issue draft 5

VSH XPress Lightweight Stainless Steel Pipework System

Product Name	Description	Size/mm	LPCB Ref. No.
R 2750	Stainless steel tube 1.4401	22, 28, 35, 42, 54	1033b/01
R 2752	Stainless steel tube 1.4521	22, 28, 35, 42, 54	
R 2753	Stainless steel tube 1.4520	22, 28, 35, 42, 54	
R 2701	Straight Coupling (2 x Press)	22, 28, 35, 42, 54	1033b/02
R 2703	Slip Coupling (2 x Press)	22, 28, 35, 42, 54	1033b/03
R 2708	90° Elbow (2 x Press)	22, 28, 35, 42, 54	1033b/04
R 2711	90° Elbow (Press x plain end)	22, 28, 35, 42, 54	1033b/05
R 2713	45° Elbow (2 x Press)	22, 28, 35, 42, 54	1033b/06
R 2712	45° Elbow (Press x plain end)	22, 28, 35, 42, 54	1033b/07
R 2725	90° Bend (2 x plain end)	22, 28, 35, 42, 54	1033b/08
R 2724	60° Bend (2 x plain end)	28, 35, 42, 54	1033b/09
R 2723	30° Bend (2 x plain end)	28, 35, 42, 54	1033b/10
R 2722	15° Bend (2 x plain end)	28, 35, 42, 54	1033b/11
R 2717	Cross over (2 x plain end)	22, 28	1033b/12
R 2714	Tee equal (3 x Press)	22, 28, 35, 42, 54	1033b/13
R 2715	Tee reduced (3 x Press)	28x22x28, 35x22x35, 35x28x35, 42x22x42, 42x28x42, 42x35x42, 54x22x54, 54x28x54, 54x35x54, 54x42x54	1033b/14
R 2718	Tee threaded (Press x fem. thread x Press)	22x1/2"x22, 22x3/4"x22, 28x1/2"x28, 28x3/4"x28, 28x1"x28, 35x1/2"x35, 35x3/4"x35, 35x1x35, 42x1/2"x42, 42x3/4"x42, 42x1"x42, 54x1/2"x54, 54x3/4"x54, 54x1"x54, 54x2"x54	1033b/15
R 2707	Reducer (Plain end x Press)	28x22, 35x22, 35x28, 42x28, 42x35, 54x35, 54x42	1033b/16
R 2702	Straight connector (Press x female thread)	22x ¹ / ₂ ", 22x ³ / ₄ ", 22x1", 28x ¹ / ₂ ", 28x ³ / ₄ ", 28x1", 28x1 ¹ / ₄ ", 35x1", 35x1 ¹ / ₄ ", 35x1 ¹ / ₂ ", 42x1 ¹ / ₄ ", 42x1 ¹ / ₂ ", 54x1 ¹ / ₂ ", 54x2"	1033b/17
R 2705	Straight connector (Press x male thread)	22x ¹ / ₂ ", 22x ³ / ₄ ", 22x1", 28x ³ / ₄ ", 28x1", 28x1 ¹ / ₄ ", 35x1", 35x1 ¹ / ₄ ", 35x1 ¹ / ₂ ", 42x1 ¹ / ₄ ", 42x1 ¹ / ₂ ", 54x1 ¹ / ₂ ", 54x2"	1033b/18
R 2735	Straight union (Press x male thread)	22x ¹ / ₂ ", 22x ³ / ₄ ", 22x1", 28x1", 35x1 ¹ / ₄ ", 42x1 ¹ / ₂ ", 54x2"	1033b/19
R 2738	Straight union (Press x female thread)	22x ³ / ₄ ", 22x1", 28x1", 35x1 ¹ / ₄ ", 42x1 ¹ / ₂ ", 54x2"	1033b/20

PART 3: SECTION 8.3

LIGHTWEIGHT PIPEWORK SYSTEMS

Product Name	Description	Size/mm	LPCB Ref. No.
R 2728	90° Angle adaptor (Press x male thread)	22x3/4", 28x1", 35x1 1/4", 42x1 1/2", 54x2"	1033b/21
R 2709	90° Angle adaptor (Press x female thread)	22x1/2", 22x3/4", 28x1/2", 28x3/4", 28x1", 35x1/2", 35x3/4", 35x1", 35x1 1/4"	1033b/22
R 2704	Coupling with nut (press x female thread)	22, 28, 35, 42, 54	1033b/23
R 2726	Flanged connector (press x flange)	22, 28, 35, 42, 54	1033b/24
R 2748	Transition connector (press x grooved)	28x33.7, 35x42.4, 42x48.3, 54x60.3	1033b/25
R 2729	Stop end (1 x press)	22, 28, 35, 42, 54	1033b/26
R 2741	Slip coupling (press x female thread)	22x1/2", 22x3/4", 28x1/2", 28x3/4"	1033b/27
R 2736	Coupling (press x flat seal)	22x1 1/4", 22x1 1/2", 28x1 1/2", 35x2", 42x2 1/4", 54x2 3/4"	1033b/28

Notes:

- The above VSH XPress pipework and fittings are to be installed using the Novopress ECO301, ACO201, ACO202, ECO201, ECO202, EFP2, EFP202 and Klauke UAP2 pressing tools in accordance with the VSH User Manual. These tools shall be serviced and maintained in accordance with the manufacturer's stated guidelines.
- VSH XPress pipework and fittings may only be installed by LPCB Approved Sprinkler Contractors who have undergone adequate training by the manufacturer.
- VSH XPress pipework and fittings shall be installed in accordance with the VSH User Manual: XPress Sprinkler EN-12-1.0.
- VSH XPress pipework and fittings shall be installed and maintained in conformance with the LPC Rules for Automatic Sprinkler Installations.
- The use of VSH XPress Sprinkler System pipework and fittings shall be recorded on LPS1048 certificates of conformity.
- Where a VSH Reducer is installed, a pipe hanger shall be used adjacent to the reducer on the larger pipe.
- Where VSH system pipework is connected to sprinklers in suspended ceilings, only LPCB Approved flexible drops shall be used.
- VSH XPress pipework and fittings are not compatible with lightweight piping systems from other manufacturers.

Certificate No: 1326a to A schedule of requirements based on TS1599: Issue Draft 5

WGalweld lightweight sprinkler pipework

Product Name	Nominal Size	Pipe Outside Diameter (mm)	Max Working Pressure (bar)	LPCB Ref. No.
WGalweld 5 pipe	25, 32, 40, 50, 65, 80, 100	33.7, 42.4, 48.3, 60.3, 76.1, 88.9, 114.3	12	1326a/01
WGalweld 5E pipe	25, 32, 40, 50, 65, 80, 100	33.7, 42.4, 48.3, 60.3, 76.1, 88.9, 114.3	12	1326a/02
WGalweld 7 pipe	25, 32, 40, 50, 65, 80, 100	33.7, 42.4, 48.3, 60.3, 76.1, 88.9, 114.3	20	1326a/03
WGalweld 7E pipe	25, 32, 40, 50, 65, 80, 100	33.7, 42.4, 48.3, 60.3, 76.1, 88.9, 114.3	20	1326a/04

Notes:

- WGalweld lightweight sprinkler pipework shall be installed in accordance with: Wuppermann 'User Guide for "WGalweld 5, 5E, 7, 7E" Steel Sprinkler Pipes' revision: 01 dated 29-08-2016.
- WGalweld lightweight sprinkler pipework shall be installed and maintained in conformance with the LPC Rules for Automatic Sprinkler Installations.
- WGalweld lightweight sprinkler pipework is compatible with LPCB approved LPS 1219 rigid and flexible couplings from other manufacturers.
- WGalweld lightweight sprinkler pipework is not compatible with lightweight sprinkler pipework from other manufacturers.
- Where WGalweld lightweight sprinkler pipework is connected to sprinklers in suspended ceilings, only LPCB approved flexible hose connectors shall be used.
- WGalweld lightweight sprinkler pipework must not be used with in-line reducers.

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Pre-action control systems for use under the *LPC Rules for Automatic Sprinkler Installations* have been approved to a schedule of requirements developed by LPCB (please contact LPCB for further details). The products shall be installed and maintained in accordance with the manufacturer's instructions.

RELIABLE SINGLE INTERLOCK PRE-ACTION SYSTEM (Pre-action Control Valve Description)

Product Name	Size(s) (mm)	Mounting Attitude	Body Material	Type	Maximum Working Pressure	Flanged or Grooved	LPCB Ref. No.
BX/E	100	Vertical	Cast Iron	Pre-action	12 bar	Flanged	034d/01
	150	Vertical	Cast Iron	Pre-action	12 bar	Flanged	
DDX 4"	100	Verticle	Ductile Iron	Pre-action	17.2	Grooved	034M/01
DDX 6"	150	Verticle	Ductile Iron	Pre-action	17.2	Grooved	034m/01
DDX 165mm	165	Verticle	Ductile Iron	Pre-action	17.2	Grooved	

Approval Conditions:

- 1) The above pre-action system employs duplicate solenoid valves, which are manufactured by firms, as detailed below. One of each shall be used.
- 2) Solenoid valves shall be installed in parallel.
- 3) Solenoid valves shall function in pneumatic condition only, and be protected by a strainer.
- 4) LPCB Certificated detectors compatible with the control and indicating equipment shall be used.
- 5) Suitable electrical detection control and indicating equipment and pneumatic systems which are compatible with the equipment identified above shall be used. The control and indicating equipment should be LPCB approved/certificated.
- 6) Connecting cables shall comply with BS 6387: 1994, classification C, W, Z evidenced by LPCB certification.
- 7) The system shall be electrically monitored to demonstrate that it is in a 'ready-to-operate' state at all times.
- 8) Clean dry air shall be used.
- 9) The equipment must be installed, operated and maintained as prescribed in The Reliable Automatic Sprinkler Co Inc installation, operating and maintenance manuals "Bulletin 717 revision C" and "Bulletin 739 revision A".
- 11) The pre-action systems shall comply with the details specified in LPC Rules for Automatic sprinkler systems Technical Bulletin 21 or 208 Supplementary Requirements for sprinkler installations which can operate in the dry mode and in the LPC Rules for Automatic Sprinkler Installations.
- 12) The Reliable Automatic Sprinkler Company Inc are the firm responsible for the complete pre-action station, including electrics. It should be noted that only the equipment specifically referenced above is LPCB approved.

Certificate No: 034d

RELIABLE SINGLE INTERLOCK PRE-ACTION SYSTEM (Solenoid Valve Description)

Product Name	Manufacturer	Voltage (V)	Power (W)	LPCB Ref. No.
LV2L BX25	Skinner	24 DC	11	034d/01
R8210A107	ASCO	24 DC	10.6	

Approval Conditions:

- 1) The above pre-action system employs duplicate solenoid valves, which are manufactured by firms, as detailed above. One of each shall be used.
- 2) Solenoid valves shall be installed in parallel.
- 3) Solenoid valves shall function in pneumatic condition only, and be protected by a strainer.

PART 3: SECTION 9.1

PRE-ACTION CONTROL SYSTEMS

- 4) LPCB Certificated detectors compatible with the control and indicating equipment shall be used.
- 5) Suitable electrical detection control and indicating equipment and pneumatic systems which are compatible with the equipment identified above shall be used. The control and indicating equipment should be LPCB approved/certificated.
- 6) Connecting cables shall comply with BS 6387: 1994, classification C, W, Z evidenced by LPCB certification.
- 7) The system shall be electrically monitored to demonstrate that it is in a 'ready-to-operate' state at all times.
- 8) Clean dry air shall be used.
- 9) The equipment must be installed, operated and maintained as prescribed in The Reliable Automatic Sprinkler Co Inc installation, operating and maintenance manual.
- 10) The pre-action system shall be configured in accordance with Reliable specifications.
- 11) The pre-action systems shall comply with the details specified in LPC Technical Bulletin 21 Supplementary Requirements for sprinkler installations which can operate in the dry mode and in the LPC Rules for Automatic Sprinkler Installations.
- 12) The Reliable Automatic Sprinkler Company Inc are the firm responsible for the complete pre-action station, including electrics. It should be noted that only the equipment specifically referenced above under (a) and (b) is LPCB approved.

Viking Pre-Action Systems (Pre-Action Control Valves descriptions)

Product Name	Size(s) (mm)	Mounting Attitude	Body Material	Type	Maximum Working Pressure (bar)	Connections	LPCB Ref. No.
Type 1 Single-Interlocked Pre-action system	50	Angle style	Ductile Iron	E-1	16	Screwed/Screwed	096f/01
	80, 100, 150	Angle Style	Ductile Iron	E-1	16	Flange/Flange Flange/Groove	096f/02
Type 1 Surefire (TM) Single-Interlocked Pre- action system	50	Angle Style	Ductile Iron	E-1	16	Screwed/Screwed	096f/03
	80, 100, 150	Angle Style	Ductile Iron	E-1	16	Flange/Flange Flange/Groove	096f/04
Type 2 Non-Interlocked Pre-action system	50	Angle Style	Ductile Iron	E-1	16	Screwed/Screwed	096f/05
	80, 100, 150	Angle Style	Ductile Iron	E-1	16	Flange/Flange Flange/Groove	096f/06
Non-Interlocked, Single or Double Interlocked Pre- action system (4)	40, 50, 65	Vertical	Ductile Iron	F-1	16	Screwed / Screwed / Grooved / Grooved	096f/07
				F-2			
				J-1			
80, 100, 150	Vertical	Ductile Iron	F-1	16	Flanged / Grooved	096f/08	
			F-2				
			J-1				
80, 100, 150, 200	Vertical	Ductile Iron	F-1	16	Flanged / Flanged Grooved / Grooved	096f/09	
			F-2				
			J-2				

Notes:

- 1) The above systems are approved for use with hydraulic, pneumatic and pneu-lectric release systems.
- 2) The above systems are available with TrimPac™.
- 3) The above systems are available as TotalPac™.
- 4) These systems are approved for use with hydraulic, non-interlocked pneumatic, non-interlocked electric, single interlocked pneumatic, single interlocked electric, double interlocked pneumatic/pneumatic, double interlocked electric/pneumatic, double interlocked electric/pneu-lectric, single interlocked SUREFIRE™ and double interlocked SUREFIRE™ release systems.

Approval Conditions:

- 1) The above pre-action system employs duplicate solenoid valves, LPCB approved, as detailed below. One of each manufacturer must be utilised.
- 2) Solenoid valves shall be installed in parallel.
- 3) Solenoid valves shall be protected by a strainer.
- 4) LPCB Certificated detectors compatible with the control and indicating equipment shall be used.

PART 3: SECTION 9.1
PRE-ACTION CONTROL SYSTEMS

- 5) Suitable electrical detection control and indicating equipment and pneumatic systems which are compatible with the equipment identified above shall be used. The control and indicating equipment should be LPCB approved/certificated.
- 6) Connecting cables shall comply with BS 6387, classification C, W, Z evidenced by LPCB certification.
- 7) The system shall be electrically monitored to demonstrate that it is in a 'ready to operate' state at all times.
- 8) Clean dry air shall be used.
- 9) The equipment must be installed, operated and maintained as prescribed in the Viking Corporation installation, operating and maintenance manuals.
- 10) The pre-action system shall be configured in accordance with Viking Corporation's datasheets.
- 11) The pre-action systems shall comply with the details specified in LPC Rules for Automatic Sprinkler Systems Technical Bulletin TB208: Supplementary Requirements for Sprinkler Installations which can operate in the dry mode.
- 12) The Viking Corporation is the firm responsible for the complete pre-action station.

Viking Pre-action Systems (Solenoid Valves Description)

Victaulic Series 769 Pre-Action System (Pre-action Control Valve Description)

Product Name	Nominal Size	Mounting Attitude	Body Material	Type	Max Working Pressure (bar)	Connections	LPCB Ref. No.
Series 769 Single Interlock (Electric)	40, 50, 65, 76.1, 80, 100, 150, 165.1, 200	Vertical	Cast Iron	Pre-action	20	Grooved	104k/01
Series 769 Single Interlock (Pneumatic/Electric)	40, 50, 65, 76.1, 80, 100, 150, 165.1, 200	Vertical	Cast Iron	Pre-action	20	Grooved	104k/02
Series 769 Double Interlock	40, 50, 65, 76.1, 80, 100, 150, 165.1, 200	Vertical	Cast Iron	Pre-action	20	Grooved	104k/03

Notes:

- 1) The above systems are approved also when configured with 'Autoconvert' option.

Approval Conditions:

- 1) The above pre-action system employs duplicate solenoid valves, which are manufactured by firms, as detailed below. One of each shall be used.
- 2) Solenoid valves shall be installed in parallel.
- 3) Solenoid valves shall function in pneumatic condition only, and be protected by a strainer.
- 4) LPCB Certificated detectors compatible with the control and indicating equipment shall be used.
- 5) Suitable electrical detection control and indicating equipment and pneumatic systems which are compatible with the equipment identified above shall be used. The control and indicating equipment should be LPCB approved/certificated.
- 6) Connecting cables shall comply with BS 6387: 1994, classification C, W, Z evidenced by LPCB certification.
- 7) The system shall be electrically monitored to demonstrate that it is in a 'ready-to-operate' state at all times.
- 8) Clean dry air shall be used.
- 9) The equipment must be installed, operated and maintained as prescribed in Victaulic installation, maintenance and testing manuals "I-769P revision D" and "I-769P-EPA revision D".
- 10) The pre-action systems shall comply with the details specified in LPC Rules for Automatic sprinkler systems Technical Bulletin 21 or 208 Supplementary Requirements for sprinkler installations which can operate in the dry mode and in the LPC Rules for Automatic Sprinkler Installations.
- 11) Victaulic Company are the firm responsible for the complete pre-action station, including electrics. It should be noted that only the equipment specifically referenced above is LPCB approved.

Victaulic Pre-Action System (Solenoid Valve Description)

Product Name	Manufacturer	Voltage (V)	Power (W)	LPCB Ref. No.
--------------	--------------	-------------	-----------	---------------

PART 3: SECTION 9.1

PRE-ACTION CONTROL SYSTEMS

Series 753E	Spartan Scientific	24 DC	10.0	104k/04
8210P007	ASCO	24 DC	2.0	104k/05

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Sprinkler system recycling systems for use under the *LPC Rules for Automatic Sprinkler Installations* have been approved to a schedule of requirements developed by LPCB (please contact LPCB for further details). The products shall be installed and maintained in accordance with the manufacturer's instructions.

The Viking Corporation

210 N Industrial Park, Hastings, Michigan 49058, USA
 Tel: +1 269 945 9501 • Fax: +1 269 945 9599

Certificate No: 096d

Approved Products

		LPCB Ref. No.
Viking Firecycle III Cycling (single interlocked) System	Flow control valves (Model H-1) 50mm 80mm 100mm 150mm Control panel (Model B-1) Heat detectors (Type FC 1002 - 140° F) M1 cable used for connecting the heat detectors in a series circuit	096d/02
Viking Firecycle III Cycling (double interlocked) System	Flow control valves (Model H-1) 50mm 80mm 100mm 150mm Control panel (Model E-1) Heat detectors (Type FC 1002 - 140° F)	096d/03

Approval Conditions:

- 1) The above Firecycle systems employs duplicate solenoid valves. For details of the solenoid valves contact Viking. The solenoid valves shall be LPCB approved.
- 2) Solenoid valves shall be installed in parallel.
- 3) Solenoid valves may function in hydraulic or pneumatic conditions, and be protected by a strainer.
- 4) Heat detectors compatible with the control and indicating equipment shall be used.
- 5) Suitable electrical detection control and indicating equipment which is compatible with the equipment identified above shall be used. The control and indicating equipment should be LPCB approved/certificated.
- 6) Connecting cables shall comply with BS 5839-1: 2002 and be LPCB approved.
- 7) The system shall be electrically monitored to demonstrate that it is in a 'ready-to-operate' state at all times.
- 8) Clean dry air shall be used where applicable.
- 9) The equipment must be installed, operated and maintained as prescribed in Viking Corporation's installation, operating and maintenance manual.
- 10) The Firecycle III systems shall be configured in accordance with Viking Corporation's specifications.
- 11) The Firecycle III systems shall comply with the details specified in LPC Technical Bulletin 208 Supplementary Requirements for sprinkler installations which can operate in dry mode.
- 12) Viking Corporation are the firm responsible for the complete Firecycle III station, including electrics.

PART 3: SECTION 10

PRESSURE SWITCHES

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Pressure switches for use under *LPC Rules for Automatic Sprinkler Installations* have been approved to a schedule of requirements developed by LPCB. The products shall be installed and maintained in accordance with the manufacturer's instructions.

PART 3: SECTION 11.1

SPRINKLER HEADS

This section lists products approved in accordance with:

- EN 12259-1 *Fixed firefighting systems. Components for sprinkler and water spray systems. Sprinklers*
- LPS 1039 *Requirements and testing methods for automatic sprinklers*
- LPCB Schedule of requirements

LPCB is a Notified Body for all of the products in this section (with the exception of ESFR and specialist sprinklers).

LPCB recommends the removal and testing of sprinkler heads from a system after 25 years and every 5 years thereafter. The areas from which the sprinkler heads are removed should take account of the different makes and models used and variation of atmospheric conditions. LPCB further recommends that sprinkler heads are replaced where problems are found.

KEY to abbreviations

Each entry includes the nominal orifice size in millimetres and the temperature ratings in degrees centigrade.

- † indicates glass bulb sprinkler head; all others are fusible element sprinkler heads.
- indicates that a corrosion-resistant coating for the body and yoke of the sprinkler has been approved under the *LPC Rules for Automatic Sprinkler Installations*.

The type of sprinkler is indicated by the following abbreviations:

Type	LPS	EN 12259-1
Conventional (upright and pendent)	CUP, CU/P	CUP
Conventional (Upright)	CU	CU
Conventional (Pendent)	CP	CP
Spray (Upright)	SU	SU
Spray (Pendent)	SP	SP
Spray, recessed (Pendent)	-	RP
Flat spray (Upright)	-	FU
Flat spray (Pendant)	-	FP
Sidewall (Upright and pendent)	WUP, WU/P	WUP
Sidewall (Upright)	WU	WU
Sidewall (Pendent)	WP	WP
Sidewall (Horizontal)	WH	WH
Sidewall, recessed (Horizontal)	-	RWH, WHR
Sidewall, concealed (Horizontal)	-	WHSCC
Sidewall, dry (Horizontal)	-	DWH
Sidewall, dry, recessed (Horizontal)	-	RDWH
Sidewall, flush (Horizontal)	WHF	WLH
Sidewall, extended coverage (Horizontal)	WHEC	-
Conventional, dry (Upright and Pendent)	CDU/P	CDUP
Conventional, dry (Upright)	CDU	CDU
Conventional, dry (Pendent)	CDP	CDP
Spray, dry (Upright)	SDU	SDU, DSU
Spray, dry (Pendent)	SDP	SDP, DSP
Conventional, flush (Pendent)	CF	CLP
Spray, flush (Pendent)	SF	SLP
Spray, dry, flush (Pendent)	SFD	SDLP
Spray, dry, recessed (Pendent)	-	DRSP
Spray, concealed, dry (Pendent)	-	CCDSP
Spray, recessed (Pendent)	SR	SRP
Spray, concealed (Pendent)	SK	SCCP, CCP, CCSP
Early suppression fast response	ESFR	-
Early protection enhanced coverage	EPEC	-

A dash (-) indicates that the type is not recognised in the standard concerned.

Notes:

- (1) Approved with plated brass, bronze, chrome, black-plated and coloured finish.
- (2) To be installed in accordance with specific installation instructions.
- (3) Only Model AG1 recessed escutcheon to be used with this sprinkler.
- (4) Only Model AG2 recessed escutcheon to be used with this sprinkler.
- (5) This ESFR sprinkler has a k-factor of 322 l.min⁻¹.bar^{-1/2} (US k-factor of 22.4 gal.min⁻¹.psi^{-1/2}).
- (6) This ESFR sprinkler has a k-factor of 200 l.min⁻¹.bar^{-1/2} (US k-factor of 14 gal.min⁻¹.psi^{-1/2}).
- (7) This ESFR sprinkler has a k-factor of 242 l.min⁻¹.bar^{-1/2} (US k-factor of 16.8 gal.min⁻¹.psi^{-1/2}).
- (8) Not to be installed in ceilings with a positive pressure in the void above.
- (9) Can be used with a solid or perforated ceiling plate (drawing 85001410).

Notes:

- 1) Also approved with chromium and painted finishes.
- 2) Approved with brass, chrome or coloured recessing cup.
- 3) This 20mm orifice sprinkler is fitted with a pintle to denote that it has a 15mm nominal thread size.
- 4) The suitability of 'quick response' sprinklers for many risks is not yet proven. Use is therefore limited to where the purchaser, authority having jurisdiction and/or insurers consent to its use. Quick response sprinklers must be handled with care due to the fragile nature of the operating element, with packaging and instructions being marked accordingly.
- 5) This extended coverage horizontal sidewall sprinkler should be handled with care to ensure that the deflector is not deformed. After installation the deflector angle should be checked with the manufacturers gauge to verify its angle of 92.5°.
- 6) The product manufacturer should be consulted to determine the product fire protection capability and installation practice. Available test evidence and the CEA document "Requirements and Test Methods for Hotel Room Horizontal Sidewall Sprinklers" should also be consulted to ensure correct usage in light hazard applications.
- 7) This sprinkler is fitted with a pintle to denote that it has a 15mm nominal thread size.

Notes:

- 1) This ESFR sprinkler has a k-factor of 200 l.min⁻¹.bar^{-½} (US k-factor of 14 gal.min⁻¹.psi^{-½})
- 2) Approved with a chromium finish.
- 3) Also approved with plated brass, black plate and dull and bright chrome finishes.
- 4) The 57°, 68°, 79° and 93° sprinklers are also approved with a white paint finish.
- 5) Incorporating Reliable F1 SP Sprinkler in Model G/F1 recessed escutcheon. To be installed in accordance with installation bulletin 119.
- 6) To be installed in accordance with installation bulletin 111G. Approved with brass, chrome or coloured recessing cup.
- 7) The Reliable G has slotted holes in the recessing cup. (The Reliable G/F1, which is similar in appearance, has no slotted holes in the recessing cup).
- 8) Not to be installed in ceilings with a positive pressure in the void above.
- 9) Incorporating Reliable G SP Sprinkler in Model G/F1 recessed escutcheon. To be installed in accordance with installation bulletin 120.
- 10) Approved with brass, chrome or white G/F1 recessed escutcheon.
- 11) The suitability of 'quick response' sprinklers for many risks is not yet proven. Use is therefore limited to where the purchaser, authority having jurisdiction and/or insurers consent to its use. Quick response sprinklers must be handled with care due to the fragile nature of the operating element, with packaging and instructions being marked accordingly.
- 12) Every five years, all sprinklers should be visually examined and representative samples removed and tested to the requirements of the authority and/or insurer.
- 13) Approved with plated brass, bronze, chrome, black-plated and coloured finish.
- 14) Incorporating reliable F1FR SP sprinkler in Model F1 recessed escutcheon.
- 15) To be installed in accordance with specific installation instructions.
- 16) Incorporating Reliable F1FR SP sprinkler in Model F2 recessed escutcheon.

- 17) Incorporating Reliable F1 SP (5mm bulb)" sprinkler in Model F1 recessed escutcheon.
- 18) This sprinkler is approved with BeNi and Cu links.
- 19) Also approved with chrome and white paint finish.
- 20) Approved with brass, chrome, black plated and white painted finish.
- 21) This ESFR sprinkler has a k-factor of 322 l.min⁻¹.bar^{-½} (US k-factor of 22.4 gal.min⁻¹.psi^{-½}).
- 22) This EPEC sprinkler has a k-factor of 115 l.min⁻¹.bar^{-½} (US k-factor of 8 gal.min⁻¹.psi^{-½}).
- 23) This sprinkler must be handled with care, and the shipping cap which protects the thermal element should only be removed after installation. To be installed in accordance with Installation Bulletin 145.
- 24) This ESFR sprinkler has a k-factor of 242 l.min⁻¹.bar^{-½} (US k-factor of 16.8.min⁻¹.psi^{-½})
- 25) Can be used with a solid or perforated ceiling plate (drawing 85001410).

Notes:

- 1) The suitability of 'quick response' sprinklers for many risks is not yet proven. Use is therefore limited to where the purchaser, authority having jurisdiction and/or insurers consent to its use. Quick response sprinklers must be handled with care due to the fragile nature of the operating element, with packaging and instructions being marked accordingly.
- 2) Approved with plain and chrome finishes.
- 3) Approved with brass, chrome or coloured recessing cup.
- 4) Approved with chrome, bright brass and painted finish coverplates.
- 5) Not to be installed in ceilings with a positive pressure in the void above.
- 6) Approved with chrome, polished brass and coloured finishes.
- 7) The "57°, 68°, 79° and 93° heads are approved with wax finishes.
- 8) Approved with chrome and white finishes.
- 9) Approved with chrome finish.

PART 3: SECTION 11.1

SPRINKLER HEADS

- 10) Approved with chrome and brass finishes.
- 11) Every five years, all sprinklers should be visually examined and representative samples removed and tested to the requirements of the authority and/or insurer.
- 12) Approved with polished chrome and white polyester finishes.
- 13) This ESFR sprinkler has a k-factor of 362.9 l.min⁻¹.bar⁻² (US k-factor of 25.2 gal.min⁻¹.psi⁻²).
- 14) Approved with recessed and adjustable escutcheon.
- 15) The VK130 & 132 sprinklers are stainless steel.
- 16) Certificated to EN12259:1999 including amendment A1:2001
- 17) Certificated to the relevant clauses of EN12259:1999 and LPS1039
- 18) Certificated to EN12259-1:1999 A3:2006
- 19) Approved with Polished Chrome and Painted White finished coverplates
- 20) Approved with plain, black and white painted and chromium plated finishes.
- 21) Not to be installed in ceilings with a positive pressure in the void above
- 22) The installation instructions, 'Sprinkler 73d, April 2012', Fig 2, must be followed. Particular attention should be paid to ensuring that the slots in the skirt are not obstructed in any way and note (21) is observed
- 23) This sprinkler must be handled with care and the protective cap which protects the thermal element should be removed only after installation to the range pipe has been completed.

ESFR-17 (11)	N/A	SP	74, 100	094b/02
ESFR-25 (12)	N/A	SP	74, 100	094b/03
† TY3250 (13)	15mm	SP	68, 93, 141, (5mm bulb)	094a/12
† ELO 231 (TY5131) (1),(14)	20mm	SU	68, 93, 141, (quick response)	094c/01
† ELO 231 (TY5231) (1),(14)	20mm	SP	68, 93, 141, (quick response)	094c/02

Notes:

- 1) Also approved with chromium finish.
- 2) This ESFR sprinkler has a k-factor of $200 \text{ l.min}^{-1}.\text{bar}^{-1/2}$ (US k-factor of $14 \text{ gal.min}^{-1}.\text{psi}^{-1/2}$).
- 3) Not to be installed in ceilings with a positive pressure in the void above.
- 4) Approved with brass, chrome, or coloured recessing cup.
- 6) The suitability of 'quick response' sprinklers for many risks is not yet proven. Use is therefore limited to where the purchaser authority having jurisdiction and/or insurers consent to its use. Quick response sprinklers must be handled with care due to the fragile nature of the operating element, with packaging and instructions being marked accordingly.
- 7) Every five years, all sprinklers should be visually examined, and representative samples removed and tested to the requirements of the authority and/or insurer.
- 8) Also approved with polyester finish.
- 9) To be installed with specific installation instructions.
- 10) Certificated with Chrome, Brass and painted coverplates.
- 11) The ESFR-17 sprinkler has a k-factor of $241.9 \text{ l.min}^{-1}.\text{bar}^{-1/2}$ (US k-factor of $16.8 \text{ gal.min}^{-1}.\text{psi}^{-1/2}$).
- 12) The ESFR-25 sprinkler has a k-factor of $362.9 \text{ l.min}^{-1}.\text{bar}^{-1/2}$ (US k-factor of $25.2 \text{ gal.min}^{-1}.\text{psi}^{-1/2}$).
- 13) Approved in grade 316 Stainless steel
- 14) This Extra Large Orifice (ELO) sprinkler has a k-factor of $160 \text{ l.min}^{-1}.\text{bar}^{-1/2}$ (US k-factor of $11.2 \text{ gal.min}^{-1}.\text{psi}^{-1/2}$).

SPRINKLER HEADS

Product Name	Nominal Orifice Size (mm)	Type	Temperature Rating (°C)	LPCB Ref. No.
† TY313 (1) (8) (15)	15mm	SU	57, 68, 79, 93, 141, (quick response)	
† TY323 (1) (8) (15)	15mm	SP	57, 68, 79, 93, 141, (quick response)	
† TY3650 (1) (15)	15mm	CU/P	57, 68, 79, 93, 141, 182 (5mm bulb)	
† TY3630 (1) (15)	15mm	CU/P	57, 68, 79, 93, 141, (quick response)	

Notes:

- 1) Also approved with coloured and chromium finishes.
- 2) The suitability of 'quick response' sprinklers for many risks is not yet proven. Use is therefore limited to where the purchaser, authority having jurisdiction and/or insurers consent to its use. Quick response sprinklers must be handled with care due to the fragile nature of the operating element, with packaging and instructions being marked accordingly.
- 3) Approved with Model F700 recessed escutcheon.
- 4) Also approved in chromium finish.
- 5) Sprinkler has 1/2" NPT thread.
- 6) Approved with Job G5 and Geissler type 'E' bulbs.
- 7) Also approved in chromium finish.
- 8) The EPEC sprinkler has a k-factor of 112.8 l.min-1.bar -1/2. Also approved with coloured and chrome finishes.
- 9) The ESFR-25 sprinkler has a k-factor of 362.9 l.min-1.bar -1/2 (US k-factor of 25.2 gal.min-1.psi-1/2).
- 10) Approved in 316 Stainless Steel material.
- 11) Approved in Titanium material.
- 12) Approved in 254 SMO Stainless Steel material.
- 13) Sprinkler has 1/2" NPT thread.
- 14) The ESFR-17 sprinkler has a k-factor of 241.9 l.min-1.bar -1/2 (US k-factor of 16.8 gal.min-1.psi -1/2).
- 15) Approved with 16mm long bulbs.
- 16) The ESFR-1 sprinkler has a k-factor of 200 l.min-1.bar -1/2 (US k-factor of 14 gal.min-1.psi-1/2).

Note:

1) Also approved with chromium, polyester and nickel/teflon finishes.

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Sprinkler Heads included in this section include a means of electronic operation in addition to the normal glass bulb mode.

Approval Conditions

- 1) LPCB approved detectors compatible with the control and indicating equipment shall be used;
- 2) Suitable electrical detection control and indicating equipment compatible with the equipment below shall be used. The control and indicating equipment shall be LPCB Approved/Certificated;
- 3) Connecting cables shall comply with BS 6387:1994 *Specification for performance requirements for cables required to maintain circuit integrity under fire conditions*, classification C,W,Z or equivalent;
- 4) The equipment must be installed, operated and maintained as prescribed in the manufacturer's Installation, Operating and Maintenance Manual;
- 5) To guard against inadvertent operation it is recommended that electrically operated sprinklers be used in conjunction with coincidence detection;
- 6) Where 'Metron' actuators are employed the maximum allowable operating temperature shall not be exceeded;
- 7) Where 'Metron' actuators are used, these shall also be LPCB approved; and
- 8) The 'Guidance' in the Part 3 Section 22 'Metron' Actuators, shall also be taken into account.

	10	SU	57, 68, 79 (quick response)	
GW-S-QR-EL(1),(2),(3),(4)	10	SP	57, 68, 79 (quick response)	
	10	SU	57, 68, 79 (quick response)	
GW-S-QR EL(1),(2),(3)	15	SP	57, 68, 79 (quick response)	
	15	SU	57, 68, 79 (quick response)	
	15	CU/P	57, 68, 79 (quick response)	

Notes:

- 1) Also approved with chrome and painted finishes.
- 2) To be installed, operated and maintained in accordance with the GW Sprinkler A/S Installation, Operating and Maintenance Manual.
- 3) Sprinklers marked EL incorporate a 'Metron' actuator.
- 4) This sprinkler is fitted with a pintle to denote that it has a 15mm nominal thread size.

PART 3: SECTION 11.3

DUAL SENSING SPRINKLER HEADS

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Dual sensing sprinkler heads have been evaluated in relation to their general performance capability but not in relation to their suitability for specific applications. The manufacturer's installation and maintenance instructions shall be followed.

Dual sensing sprinkler heads are only suitable for use on fully hydraulically calculated systems.

Project Fire Products Limited

Pasturefields Lane Industrial Estate, Pasturefields Lane, Hixon, Staffordshire ST18 0PH, United Kingdom

Tel: +44 (0)1889 270999 • Fax: +44 (0)845 2800116

E-mail: sales@projectfire.co.uk • Website: www.projectfire.co.uk

Certificate No: 060b

Product Name	Nominal Orifice Size (mm)	Type	Temperature Rating (°C)	LPCB Ref. No.
'Gemini'	15 (1, 2)	SP	68 (1)	060b/01

Notes:

- 1) Sprinkler assembly only approved when fitted with Viking Model M "Microfast" 15mm SP Sprinkler head as per section 11.1 .
- 2) The K factor of the 'Gemini' dual sensing sprinkler head is $58.6 \text{ l.min}^{-1}.\text{bar}^{-1/2}$.
- 3) Dual sensing sprinkler heads are only suitable for use on fully hydraulically calculated systems.

This section lists products approved in accordance with:

- LPS 1039 *Requirements & Testing Methods for Automatic Sprinklers*
- LPS 1258 *Requirements & Testing Methods for Automatic Sprinkler Glass Bulbs with a Narrow Operating Temperature Band*
- EN 12259-1 *Fixed firefighting systems. Components for sprinkler and water spray systems.*

These bulbs may be used in sprinkler heads listed in Section 11.

Note:

1) Suitable for use in quick response sprinklers.

PART 3: SECTION 13

SUCTION TANKS FOR AUTOMATIC PUMPS

This section lists products approved in accordance with:

- LPS 1276 *Requirements for suction tanks for automatic pumps.* (Section 13.1)
- LPS 1254 *Requirements for suction tanks for automatic pumps.* (Section 13.2)

The use of LPS 1254 has been replaced by LPS 1276 for new installations in the UK and Ireland. The use of LPS 1254 in other territories should be confirmed with the relevant Insurance or Regulatory bodies. The two standards will co-exist pending ongoing review, any changes to this position will be updated on the Red Book Live website.

Approval Conditions are set out in each section and take precedence over any material contained in other documentation for the purposes of LPCB recognition.

LPS 1276 Tanks

1) In accordance with the requirements of EN 12845, the following definitions are derived:

Single supply tank:	A water storage tank which shall be designed and protected against corrosion such that the need for emptying the tank for maintenance is reduced to a period of not less than 3 years .
Superior supply tank:	A water storage tank which shall be designed and protected against corrosion such that the need for emptying the tank for maintenance is reduced to a period of not less than 10 years .

2) Each single-supply or multi-level take-off tank supplied under this approval scheme must not exceed a maximum capacity of 1300m³. Duplicate sub-divided tanks may have a total capacity not exceeding 2600m³, provided the dividing wall is structurally capable of supporting either compartment full whilst the other is empty, and the maximum capacity of each compartment does not exceed 1300m³.

3) It may be necessary for a current Regulations Advisory Scheme, WRAS (formerly Wrc), certificate to be held by the manufacturer, specific to each tank listed.

4) Galvanised “Superior” steel tanks shall have the tank shell protected by:

(a) a coating weight of at least 610g/m² each side, with such tank entries marked ‘g’,
or

(b) an equivalent corrosion protection system which has been specifically approved and listed by the LPCB, with such tank entries marked ‘e’.

5) The purchaser shall specify the required tank designation “Superior” or “Single” in accordance with the LPC Rules for Automatic Sprinkler Installations, together with the tank reference number.

6) The tank must bear a plate stating:

(i) The name and address of the manufacturer.

(ii) The date of installation.

(iii) The LPCB Reference Number, including the type suffix (“Superior” or “Single”) which has been specified by the purchaser and agreed by the manufacturer.

(iv) The maximum capacity in cubic metres. Multi-supply tanks must indicate the capacity for the automatic sprinkler system separately.

Tanks which do not bear such a plate are not approved.

7) Specifiers of LPCB approved sprinkler suction tanks are advised to ensure that where a vortex inhibitor is used in accordance with the LPC Sprinkler Rules, that the vortex inhibitor used is listed in Part 3 Section 14 of the Red Book as LPCB approved.

8) Where “Superior” tank shell exteriors are not protected by 610g/m² or equivalent, appropriate inspection, service and maintenance shall be specified. Exterior shell protection of 300g/m² galvanising is set as the minimum acceptable level of exterior protection combined with specified inspection service and maintenance.

9) Immersion heaters used to prevent the ball valve and water in the vicinity from freezing shall be dual element type.

Certificate No: 445b to LPS 1276-1.2

PART 3: SECTION 13.1

LPS 1276 TANKS

LPS 1276 - Suction Tanks for Automatic Sprinkler Systems

Product Name	Description	LPCB Ref. No.
Single supply tank	M100 rectangular, sectional, hot press moulded GRP panel tank. Maximum height 4m. <i>Maximum capacity 880m³</i>	445b/01
Superior supply tank	M100 rectangular, sectional, hot press moulded GRP panel tank. Maximum height 4m. <i>Maximum capacity 880m³</i>	445b/02
Single supply tank	HB rectangular pressed steel sectional galvanized tank to BS1564:1975 Type 1 (Hot Pressed), with galvanized steel roof. Maximum height 5m. <i>Maximum capacity 1300m³</i> .	445b/03
Superior supply tank	HB rectangular pressed steel sectional galvanized tank to BS1564:1975 Type 1 (Hot Pressed) with galvanized steel roof. Maximum height 5m. <i>Maximum capacity 1300m³</i> .	445b/04
Single supply tank	Bolted cylindrical galvanized steel plate tank lined with an EPDM, butyl rubber or PVC liner and fitted with a galvanized steel decking roof externally coated with PVC. <i>Maximum capacity 1300m³</i> .	445b/05
Superior supply tank	Bolted cylindrical galvanized steel plate tank lined with an EPDM, butyl rubber or PVC liner and fitted with a galvanized steel decking roof externally coated with PVC. <i>Maximum capacity 1300m³</i> .	445b/06

All tank approvals are strictly subject to tanks being supplied in accordance with LPCB Approved Conditions set out in the 'introduction'

Certificate No: 044c to LPS1276 1.1

Suction Tanks for Sprinkler Systems

Certificated Products		LPCB Ref. No.
Single supply tank	Bolted cylindrical, mastic sealed, galvanized steel plate tank with a galvanized steel decking cover that is externally coated with PVC. <i>Maximum capacity 1300m³</i>	044c/01
Superior supply tank	Bolted cylindrical, mastic sealed, galvanized steel plate tank with a galvanized steel decking cover that is externally coated with PVC. <i>Maximum capacity 1300m³</i>	044c/02g
Single supply tank	Bolted rectangular, mastic sealed galvanized steel panel tank with a galvanized steel decking cover. Suitable for restricted space locations. Designed to most shapes using 90 degree corners and up to 3m in height. <i>Maximum capacity 1300m³</i>	044c/03
Superior Supply Tank	Bolted rectangular, mastic sealed galvanized steel panel tank with a galvanized steel decking cover. Suitable for restricted space locations. Designed to most shapes using 90 degree corners and up to 3m in height. <i>Maximum capacity 1300m³</i>	044c/04e
Single supply tank	Bolted cylindrical, rubber liner sealed, galvanized steel plate tank with a galvanized steel decking cover that is externally coated with PVC. <i>Maximum capacity 1300m³</i>	044c/05
Superior supply tank	Bolted cylindrical, rubber or PVC* liner sealed, galvanized steel plate tank with a galvanized steel decking cover that is externally coated with PVC. <i>Maximum capacity 1300m³</i>	044c/06e

Notes:

* PVC liner is manufactured by Power Plastic and/or Stephens Industries Limited.

All tank approvals are strictly subject to tanks being supplied in accordance with LPCB Approved Conditions set out in the 'Introduction'. For galvanized steel tanks, Type "Superior", the designation 'g' refers to tanks protected by 610g/m² each side and the designation 'e' refers to equivalent corrosion protection as set out in Item 4 of the Introduction.

PART 3: SECTION 13.2

LPS 1254 TANKS

1) The BS 5306 LPC *Rules for Automatic Sprinkler Installations* identifies the following types of pump suction tanks:

Note: This specification is withdrawn for all contracts delivered after 1st April 2009.

<i>Type A</i>	Not dependent on inflow, fed from a potable water supply, and suitable for sprinkler service without emptying, cleaning, maintenance or repair for a period of not less than 15 years.
<i>Type B</i>	Not dependent on inflow.
<i>Type C</i>	Dependent on inflow.
<i>Type D</i>	Dependent on inflow, fed from a potable water supply, and suitable for sprinkler service without emptying, cleaning, maintenance or repair for a period of not less than 15 years.

The type of tank approved or certificated is indicated by capital the letter A, B, C or D at the end of the LPCB Reference number in the product listing.

2) Each single-supply or multi-level take-off tank supplied under this approval scheme must not exceed a maximum capacity of 1300m³. Duplicate sub-divided tanks may have a total capacity not exceeding 2600m³, provided the dividing wall is structurally capable of supporting either compartment full whilst the other is empty, and the maximum capacity of each compartment does not exceed 1300m³

3) Continuation of approval is conditional upon a current Regulations Advisory Scheme, WRAS certificate (formerly WrC) being held by the manufacturer, specific to each tank listed.

4) 1,2 Galvanised steel tanks Type A and D shall have the tank shell protected by:

(a) a coating weight of at least 610g/m² each side, with such tank entries marked 'g',
or

(b) an equivalent corrosion protection system which has been specifically approved and listed by the LPCB, with such tank entries marked 'e'.

5) 1 Galvanised steel tanks Types B and C shall have the tank shell protected by a coating weight of at least 300g/m² each side, or an equivalent corrosion protection system, approved and listed by the LPCB.

6) The purchaser shall specify the required tank designation A, B, C or D in accordance with the LPC *Rules for Automatic Sprinkler Installations*, together with the tank reference number.

7) The tank must bear a plate stating:

(i) The name and address of the manufacturer.

(ii) The date of installation.

(iii) The LPCB Reference Number, including the type suffix (A,B,C or D) which has been specified by the purchaser and agreed by the manufacturer.

(iv) The maximum capacity in cubic metres. Multi-supply tanks must indicate the capacity for the automatic sprinkler system separately.

Tanks which do not bear such a plate are not approved.

8) Specifiers of LPCB approved sprinkler suction tanks are advised to ensure that where a vortex inhibitor is used in accordance with the LPC Sprinkler Rules, that the vortex inhibitor used is listed in Part 3 Section 14 of the Red Book as LPCB approved.

Note 1. Corrosion protection systems specified should be regarded as minimum levels and additional protection may be warranted in special circumstances to achieve a design life of at least 15 years (Types A & D) or 6 years (Types B & C).

PART 3: SECTION 14

VORTEX INHIBITORS

This section lists products approved in accordance with:

- LPCB Schedule of requirements

The new edition of the LPC Sprinkler Rules, incorporating EN12845 *Fixed Firefighting Systems. Automatic Sprinkler Systems. Design, Installation and Maintenance*, includes requirements whereby the minimum dimension from the suction pipe to the minimum low water level can be reduced if a suitable vortex inhibitor is installed. Where the listed vortex inhibitors meet this requirement this is shown by a note in the listing.

Balmoral Tanks Limited

Certificate No: 060a

Flow switch automatic tester system

Product Name	LPCB Ref. No.
ZONECHECK	060a/01

Guidance and approval conditions.

Zonecheck shall be installed in accordance with Project Fire Products Limited 'Instruction Booklet', but subject to guidance below taking precedence.

- 1) The Zonecheck system circulates, but does not draw-off water from the sprinkler system and consequently does not test any zone or control valves.
- 2) System approval based on use with LPCB approved and listed flow switch.
- 3) Effective operation of the Zonecheck system should be monitored.
- 4) In the event of any servicing being warranted on this system, it shall be ensured that this does not impair effective sprinkler protection.
- 5) Provision to test flow switches in the normal way (LPC Sprinkler Rules) should also be incorporated.
- 6) It shall be ensured that the associated pipework is adequately vented and charged hydraulically.
- 7) The automatic means of operation and recording does not form part of this approval.

Zone Guardian DN65	76.1 x 76.1	T	12	
Zone Guardian DN80	88.9 x 88.9	T	12	
Zone Guardian DN100	114.3 x 114.3	T	12	
Zone Guardian DN150	165.1 x 165.1	T	12	
	168.3 x 168.3	T	12	

Notes:

- 1) Zone Guardian Flow Switch Test Device shall be installed in accordance with IOM2, Zone Guardian Installation & Operation Instructions, Rev A, 24 May 2017.
- 2) Technical product approval is based on use with LPCB approved and listed flow switch.
- 3) Effective operation of the Zone Guardian Flow Switch Test Device should be monitored.
- 4) In the event of any servicing being warranted on this device, it shall be ensured that this does not impair effective sprinkler protection.
- 5) Provision to test flow switches in the normal way (LPC Sprinkler Rules) should also be incorporated.
- 6) It shall be ensured that the associated pipework is adequately vented and charged hydraulically.
- 7) The automatic means of operation and recording does not form part of this approval.
- 8) All above sizes are approved in left and right handed versions.

PART 3: SECTION 15.3

WET ALARM VALVE TESTING DEVICE FOR SPRINKLER SYSTEMS

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Wet alarm valve testing devices for use with automatic sprinkler systems have been approved to a schedule of requirements developed by LPCB. The products shall be installed and maintained in accordance with the manufacturer's instructions.

PART 3: SECTION 16.1

WATER SPRAY SYSTEMS (MEDIUM AND HIGH VELOCITY)

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Medium and high velocity sprayers for use under *LPC Rules for Automatic Sprinkler Installations* on oil and flammable liquid hazards have been approved to a schedule of requirements developed by LPCB. The products shall be installed and maintained in accordance with the manufacturer's instructions.

Certificated Products

GW R (1),(2),(3) 15mm long-throw horizontal open sprinkler

**LPCB Ref.
No.
084j/01**

1) Also approved with chromium finish.

2) To be installed in accordance with the supplier's installation instructions.

3) Application is limited to where purchaser, authority having jurisdiction and/or insurer consent to use.

This section lists products approved in accordance with:

- LPS 1131 *Pumps for Automatic Sprinkler Installation. Pump Sets - Requirements and testing methods.*

Firms listed in this section shall control and be responsible for the design, construction, testing and performance of all fire pump sets incorporating their LPCB approved fire pumps.

All fire pump sets incorporating LPCB approved fire pumps shall conform to the *LPC Rules for Automatic Sprinkler Installations*, or Rules specified in the contract, and shall be tested in accordance with the LPC Sprinkler Rules.

Note: Only LPCB approved fire pumps shall be used to comply with the *LPC Rules for automatic sprinkler installations*.

Pumps are approved for a maximum working pressure of 12 bar except where stated.

*These pumps are approved with impeller diameters and speeds within the ranges shown, to provide flows and heads within those ranges.

The above pumps are fitted with Danfoss type EVSI 'closed head' relief valves.

- 1) Pump configurations which generate a closed valve head exceeding 10 bar are approved for use in accordance with TB13: 1990: 1 - High rise sprinkler systems
- 2) Maximum working pressure: 15.6 bar.
- 3) Maximum working pressure: 13 bar.
- 4) Maximum working pressure: 16.5 bar.

PART 3: SECTION 17.1

FIRE PUMPS

Product Name	Type	Suction Inlet Diameter/ Discharge Outlet Diameter (mm)	Impeller Diameter (mm)	Rated Speed (rev/min)	Rated Flow (L/min) (at NPSH req. = 5.38m)	Rated Head (bar) (at NPSH req. = 5.38m)	Closed Valve Head (bar)	LPCB Ref. No.
			480	1760	13540 at 5.38m	10.7	12.0	
			370	1760	12540 at 5.0m	5.7	7.3	
			370	1760	12900 at 5.38m	5.6	7.3	

* These pumps are approved with impeller diameters and, where applicable, speeds within the ranges shown, to provide flows and heads within those ranges.

Notes:

- 1) Pump configurations which generate a closed valve head exceeding 10 bar are approved for use in accordance with BS EN 12845:2004+A2:2009 - Annex E - Special requirements for high rise systems.
- 2) Maximum working pressure: 21 bar.
- 3) Maximum working pressure: 20 bar.
- 4) Maximum working pressure: 18 bar.
- 5) The above pumps are also approved with alternate material options of bronze impeller and/or stainless steel shaft.
- 6) Maximum working pressure 14 bar.

The above pumps are fitted with "closed head" relief valve Pt. No. 25652 - 511 - 000 - 7 or Pt. No. 25652-501-000-2.a

This section lists products approved in accordance with:

- LPS 1131 *Pumps for Automatic Sprinkler Installation. Pump Sets - Requirements and testing methods.*

Firms listed in this section shall control and be responsible for the design, construction, testing and performance of all fire pump sets incorporating their LPCB approved fire pumps.

All fire pump sets incorporating LPCB approved fire pumps shall conform to the *LPC Rules for Automatic Sprinkler Installations*, or Rules specified in the contract, and shall be tested in accordance with the LPC Sprinkler Rules.

Only LPCB approved fire pumps shall be used to comply with the *LPC Rules for Automatic Sprinkler Installations*.

Pumps listed in this section are suitable for use in pump sets for high-rise and multi-storey buildings.

SPP Pumps Limited

1420 Lakeview, Arlington Business Park, Theale, Reading, Berkshire RG7 4SA, United Kingdom

E-mail: john_hollins@sppumps.com • Website: www.sppumps.com

Certificate No: 111b

Product Name	Suction Inlet Diameter/ Discharge Outlet Diameter (mm)	Delivery Configuration	Impeller Diameter (mm)	Rated Speed (rev/min)	Rated Flow (l/min) (at NPSH req. <= 5.38m)	Rated Head (bar) (at NPSH req. <= 5.38m)	Closed Valve Head (bar)	LPCB Ref. No.
CD10K 2-5 stage Multistream multistage pump	125/100	(1) Single stage - closed stage or final outlet	219	2950	2800	4.8	7.0	111b/22
			202	2950	2800	3.3	5.5	
		(2) Single stage - intermediate outlet	219	2950	2800	3.7	7.5	
			202	2950	2800	1.4	5.9	
			219	2950	2800	24.0	35.0	
(3) Final outlet of five stage pump	202	2950	2800	16.5	27.5			

The pump performance is the summation of each stage, i.e. the performance at the final outlet of a four stage pump ism 4 x (1).

The performance at the fourth stage intermediate outlet of a five stage pump is 3 x (1) + (2).

The performance at the final outlet of a five stage pump is 5 x (1), as detailed in (3).

The above pump is approved with impeller diameters within the range shown, to provide flows and heads within the ranges shown.

The above pump is fitted with 'closed head' relief valve part no. 25652-511-000-7.

Certificate No: 111b

Product Name	Suction Inlet Diameter/ Discharge Outlet diameter (mm)	Delivery Configuration	Impeller Diameter (mm)	Rated Speed (rev/min)	Rated Flow* (L/min) (at NPSH req <= 5.38m)	Rated Head (bar) (at NPSH req <= 5.38m)	Closed Valve Head (bar)	LPCB Ref. No.
CD12K 2-10 stage Multistream multistage pump	150/125	Single stage - closed stage or final outlet	308	1470	4290	2.3	3.7	111b/28
			247	1470	3930	0.5	2.2	

PART 3: SECTION 17.2

MULTI-STAGE FIRE PUMPS

Product Name	Suction Inlet Diameter/ Discharge Outlet diameter (mm)	Delivery Configuration	Impeller Diameter (mm)	Rated Speed (rev/min)	Rated Flow* (L/min) (at NPSH req <= 5.38m)	Rated Head (bar) (at NSPH req <= 5.38m)	Closed Valve Head (bar)	LPCB Ref. No.
		Single stage - intermediate outlet	308	1470	4290	0.8	3.7	
			247	1470	3930		2.2	
		Final outlet of ten stage pump	308	1470	4290	23.0	37.0	
			247	1470	3930	5.0	22.0	

The pump performance is the summation of each stage, i.e. the performance at the final outlet of an eight stage pump is 8 x (1).

The performance at the seventh stage intermediate outlet of an eight stage pump is 6 x (1) + (2).

The performance at the final outlet of a ten stage pump is 10 x (1), as detailed in (3).

The above pump is fitted with 'closed head' relief valve part no. 25652-511-000-7.

*The minimum bypass flow rate is 160 L/min.

This section lists products approved in accordance with:

- LPS 1239 *Requirements for LPCB Approval of Diesel Engines for Sprinkler Pump Sets.*

LPCB approved diesel engines shall be used in fire pump sets which conform to the *LPC Rules for Automatic Sprinkler Installations*.

For pump sets requiring a diesel engine with a power/speed rating outside the range of approved diesel engines listed, such diesel engines should conform to LPS 1239, Issue 1.

LPCB Approved engines are approved for use between the following limits:

- Not greater than the approved rated engine power at the rated speed.
- Not less than 40% of the approved rated engine power at the rated speed

The responsibility for the design, construction, testing and performance of all fire pump sets incorporating LPCB approved diesel engines lies with the pump set manufacturer.

PART 3: SECTION 20

STOP VALVES

This section lists products approved in accordance with:

- LPCB Schedule of requirements
- LPS 1185 *Requirements for Testing Methods for Remote Monitored Gear Operated Butterfly Stop Valves*

Stop valves listed below are considered acceptable for use in installations conforming to the *LPC Rules for Automatic Sprinkler Installations*. The products shall be installed and maintained in accordance with the manufacturer's instructions.

PART 3: SECTION 21.1

PLASTIC PIPES AND FITTINGS

This section lists products approved in accordance with:

- LPS 1260 *Requirements for testing plastic pipes and fittings for sprinkler systems.*

The 'scope of use' of plastic pipe shall be agreed between the plastics suppliers, purchaser/installer, authority having jurisdiction and/or insurer in accordance with documented supplier 'Installation Instructions' but subject to the following criteria taking precedence.

- 1) Use of plastic pipe and fittings is subject to water authority agreement for the district or territory concerned.
- 2) LPCB Approved quick response sprinklers shall be used with exposed (i.e. fire exposure) plastic pipe and fittings.
- 3) Plastic pipe and fittings are suitable for use only with wet pipe systems.
- 4) Use of water additives is only permitted in accordance with the manufacturer's installation instructions.
- 5) Care should be exercised to ensure that the adhesive joints are adequately cured, in accordance with the manufacturer's installation instructions, prior to pressurisation.
- 6) Plastic pipe and fittings shall not be installed outdoors.
- 7) Where plastic pipe and fittings are exposed (i.e. fire exposure), the system shall be installed close to a flat ceiling construction.
- 8) Sprinkler systems which employ plastic pipe and fittings shall be designed where possible to ensure there are no 'no flow' sections of pipework in the event of sprinkler operation.

Notes relating to Aquatherm pipes and fittings:

- 1) The system of pipes and fittings must be installed in accordance with the Aquatherm installation instructions, which include Annex "Technical Instruction aquatherm red pipe" dated 01/12/2012 Issue 2.
- 2) The maximum normal ambient temperature of use shall not exceed 70°C.
- 3) The products shall only be installed by LPCB Certificated or Registered Installing companies (see Part 5, Section 1A and 1B above) or by firms outside the UK who can provide evidence of personnel training in the installation of the product. It is recommended that firms engaged in the installation of this product also be Certificated to ISO 9000.

Notes relating to Nibco Inc fittings:

- 1) Nibco Fittings are LPCB approved for use with Viking Plastics and Harvel LPCB approved pipes and Nibco FP-1000 "One-Step Solvent Cement" adhesive.
- 2) Where assemblies are made using Harvel pipe, the system of pipe and fittings must be installed in accordance with Nibco Inc Installation Instructions (Nibco Ref: IM-BLZME-0608 dated 19/05/08). which includes LPCB Conditions of Use agreed with Nibco
- 3) Where assemblies are made using Viking pipe, the system of pipe and fittings must be installed in accordance with Nibco Inc Installation Instructions (Nibco Ref: IM-BLZME-0608 dated 19/05/08) and Viking Plastics 'Blazemaster' Installation and Design Manual (Viking Ref: F_080712 (1/6/16) Rev 16.1) which includes LPCB Conditions of Use agreed with Nibco and Viking
- 4) The maximum normal ambient temperature of use shall not exceed 50°C.

PART 3: SECTION 21.1**PLASTIC PIPES AND FITTINGS**

- 5) The products shall only be installed by LPCB Certificated or Registered installing companies (see Part 5, Section 1A and 1B above), or by firms outside the UK who can provide evidence of personnel training in the installation of the product. It is recommended that firms engaged in the installation of this product also be LPCB Certificated to ISO 9001.
- 6) Nibco Blazemaster CPVC fittings are manufactured from Blazemaster CPVC materials that are WRAS listed.
- 7) Blazemaster® is a registered trademark of Lubrizol Advanced Materials, Inc.

Notes:

1. The system of pipe and fittings must be installed in accordance with Spears Manufacturing Company installation instructions FGUK-3-1014, which includes LPCB conditions of use agreed with Spears Manufacturing Company.
2. The maximum normal ambient temperature of use shall not exceed 50°C.
3. LPCB approval does not cover the use of CPVC fire sprinkler piping below ground.
4. The products shall only be installed in the UK by LPCB Certificated or Registered installing companies (see Part 3, Section 1.1, 1.2 and 1.3), or by firms outside the UK who can provide evidence of personnel training in the installation of the product.

Certificate No: 293b

Notes relating to Tyco Fire Products pipes and fittings:

- 1) The system of pipe and fittings must be installed in accordance with the Tyco Fire Products Installation Handbook IH-1900 Revision March 2015, which includes LPCB Conditions of Use agreed with Tyco.
- 2) The maximum normal ambient temperatures of use shall not exceed 50°C.
- 3) The products shall only be installed by LPCB Certificated or Registered Installing companies (see Part 3, Sections 1.1, 1.2 and 1.3) or by firms outside the UK who can provide evidence of personnel training in the installation of the product. It is recommended that firms engaged in the installation of this product also be LPCB Certificated to ISO 9001.
- 4) Tyco BlazeMaster CPVC sprinkler pipes are manufactured from Blazemaster CPVC materials that are Wrc (WRAS) listed.

Certificate No: 420a

Notes relating to Viking Plastics fittings:

- 1) Viking Plastics Fittings are LPCB approved for use with Viking Plastics and Harvel LPCB approved pipes and Nibco FP-1000 "One-Step Solvent Cement" adhesive.
- 2) Where assemblies are made using Harvel pipe, the system of pipe and fittings must be installed in accordance with Nibco Inc Installation Instructions (Nibco Ref: IM-BLZME-0608 dated 19/05/08). which includes LPCB Conditions of Use agreed with Nibco
- 3) Where assemblies are made using Viking pipe, the system of pipe and fittings must be installed in accordance with Nibco Inc Installation Instructions (Nibco Ref: IM-BLZME-0608 dated 19/05/08) and Viking Plastics 'Blazemaster' Installation and Design Manual (Viking Ref: F_080712 (1/6/16) Rev 16.1) which includes LPCB Conditions of Use agreed with Nibco and Viking.
- 4) The maximum normal ambient temperature of use shall not exceed 50°C.
- 5) The products shall only be installed by LPCB Certificated or Registered installing companies (see Part 3, Section 1.1,1.2 and 1.3), or by firms outside the UK who can provide evidence of personnel training in the installation of the product. It is recommended that firms engaged in the installation of this product also be LPCB Certificated to ISO 9001.
- 6) Viking Plastics Blazemaster CPVC fittings are manufactured from Blazemaster CPVC materials that are WRAS listed.
- 7) Blazemaster® is a registered trademark of Lubrizol Advanced Materials, Inc.

PART 3: SECTION 21.2

POLYMERIC COMPOUNDS FOR PLASTIC PIPES AND FITTINGS

This section lists products approved in accordance with:

- LPS 1260 *Requirements for testing plastic pipes and fittings for sprinkler systems.*

Notes:

The compounds listed in this section have been tested and approved for the production of the plastic pipes and fittings listed in Section 21.1.

As the pipes and fittings themselves must be tested and approved to LPS 1260, only those products listed in Part 3 Section 21.1 are LPCB approved. Products manufactured from compounds in section 21.2 but not listed in Part 3 Section 21.1 are not LPCB approved.

Lubrizol Advanced Materials Inc

4200 Bells Lane, Louisville, Kentucky 40211, USA

Tel: +1 502 7725709

E-mail: Lynn.Huff@Lubrizol.com • Website: www.lubrizol.com

Additional address:

Lubrizol Advanced Materials Inc, 9911 Brecksville Road, Cleveland, Ohio 44141, USA

Tel: +1 216 4477239

E-mail: Forest.Hampton@Lubrizol.com • Website: www.lubrizol.com

Certificate No: 535a

Product Name	Part No.	LPCB Ref. No.
CPVC Pipe Compound	88738 ORG 734G	535a/05
	3138 ORG 734G	535a/07
CPVC Fitting Compound	88065 ORG 734G	535a/06
	3238 ORG 734G	535a/08

Notes:

- 1) This is an approval of the compounds, not the pipe and fittings. Approval of pipes and fittings using these compounds is dependent on conformance with LPS 1260.
- 2) Firms engaged in manufacturing fire sprinkler pipe and fitting products from these compounds shall also be LPCB Certified.
- 3) BlazeMaster® CPVC sprinkler pipes and fittings manufactured from BlazeMaster® CPVC pipe and fitting materials are WRc (WRAS) listed.
- 4) BlazeMaster® is a registered trademark of Lubrizol Advanced Materials.

This section lists products approved in accordance with:

- LPCB Schedule of requirements

Metron actuators listed below have been evaluated in relation to their general performance capability but not in relation to their suitability for specific applications.

LPCB strongly recommends that:

- 1) Care shall be exercised to ensure that the monitoring current specified by the manufacturer is not exceeded.
- 2) The manufacturer's installation instructions and product safety instructions shall be followed.
- 3) These devices shall be replaced every ten years.
