Appendix to Certificate No: 1062d UTC Fire and Security B.V Electronic Key Solutions

Issue: 04

Key Safe

Product Name	Model	Part No.	Installation Instructions	Security Rating	LPCB Ref. No.
TRAC-Vault BT SMART L	Wall mounted key safe operated by IrDA fob	002177	P/N10103266P1-01 (rev A) April 2014	2	1062d/01

Notes:

1. The TRAC-Vault BT SMART L key safes are approved when mounted either directly onto masonry walls or onto rendered masonry walls with renders up to 10 mm thick, in accordance with the instructions noted in the above table. The approval does not cover the key safes when mounted to alternative substrates.
2. The resistance of access control locks to "non-mechanical" attack has not been assessed as it is outside the scope of LPS 1175. Likewise, the approval does not cover possible effects of any susceptibilities relating to the functionality and performance of ancillary equipment that may be used in conjunction with those locks. It is therefore recommended that specifiers satisfy themselves that the components used are either resistant to electronic methods of attack, or that they are suitably protected from such tampering/abuse and are resistant to any environmental conditions/interference that may cause the locking system to disengage.
