

Certificate of Product Approval

Certificate Number: 1476f

Issue: 01

Teckentrup GmbH & Co. KG

Industriestraße 50
33415 Verl-Sürenheide
Germany

is authorised to use the LPCB mark in association with the product(s) listed in this certificate and appendix having complied with the requirements of the standard(s) detailed below:

Product

Teckentrup 62 Secure 2 FB4
hinged security doorsets

Standard

LPS 1175: Issue 8
Requirements and testing procedures for the LPCB certification and listing of intruder resistant building components, strongpoints, security enclosures and free-standing barriers

This certificate and appendix is maintained and held in force through regular surveillance activities

Signed for BRE Global Ltd.

Cylinder Reference	Manufacturer	Model	Type
AZ	ASSA	C5857	Rim

Optional Design Features / Accessories

Option	Description
Dog bolts	Optional dog bolts on trailing edge
Frame profiles	Alternative frame profiles for installation onto corners and surrounds instead of within a reveal
Kick plate	Steel kick plate mechanically fixed to the leaf
Thresholds	Flat or stepped thresholds

Notes:

1. The approval covers double leaf doorsets with leaves of equal or unequal width. Except for tower bolts, the operation of the passive leaf hardware should be identical to the active leaf hardware.
2. The ballistic rating of the doorset is outside the scope of the LPS 1175 approval.
3. Certification does not cover the use of locks or optional design features / accessories other than those listed. Utilisation of unlisted locks/options may affect the level of security afforded by the doorset.
4. The resistance of the mechatronic cylinders to "non-mechanical" attack has not been assessed as it is outside the scope of LPS 1175. Likewise, the approval does not cover possible effects of any susceptibilities relating to the functionality and performance of ancillary equipment that may be used in conjunction with those cylinders. It is therefore recommended that specifiers satisfy themselves that the components used are either resistant to electronic methods of attack, or that they are suitably protected from such tampering/abuse and are resistant to any environmental conditions/interference that may cause the locking system to disengage.
5. The doorsets are approved for installation into brickwork, blockwork, reinforced concrete and structural steelwork in accordance with the instructions contained on the document titled 'Single and double leaf steel doors Secure 1/Secure 2/ Secure A/Secure B- Planning, Installation and Maintenance Instructions' dated 31/07/19.
