Notes:

- The cage's resistance relies on the supporting substrate offering compatible resistance to manual attack.
- The cat flaps do not undermine the security rating attributed to the cages providing the cat flap remains secured in the closed position. The aperture protected by the flap may be exploitable when the flap was not secured in the closed position. The security rating applied to the enclosures and cabinets will be invalid when the cat flap is left open or unsecured.
- The SCS/DV4 security cage system is approved when installed in accordance with the instructions detailed on documents SCS/DV4/FIT-01 (Rev C) and SCS/DV4/PADLOCK (Rev B).
