

Certificate of Product Approval

Certificate Number: 645b

Issue: 05

Steelway Fensecure Limited t/a Steelway Brickhouse

Brickhouse Lane
West Bromwich
West Midlands
B70 0DY

is authorised to use the LPCB mark in association with the product(s) listed in this certificate and appendix having complied with the requirements of the standard(s) detailed below:

Product

Briplate SUB
Defender SEC 4
Multi Guard 3
Multi Guard V3
Sentry
Sentry Lift Off
Sentry Mk2
Sentry SEC 47
horizontal access covers

Standard

LPS 1175: Issue 7
Requirements and testing procedures for the LPCB approval and listing of intruder resistant building components, strongpoints, security enclosures and free-standing barriers

This certificate and appendix is maintained and held in force through regular surveillance activities

Appendix to Certificate No: 645b Steelway Fensecure Limited t/a Steelway Brickhouse

Issue: 05

Notes

- The width is measured as follows:
 - Along the hinge edge of the single and twin upstand access covers.
 - Along the hinge edge of the single leaf flush-fitting covers.
 - Along the non-hinged edge of the twin, triple and multiple leaf flush fitting covers.
 - Along the locking edge of the lift-off access covers.The length is measured perpendicular to the width dimension defined above.
- The access covers achieve the security ratings noted for the creation of apertures through which to pass the 400 mm by 225 mm elliptical test block.
- The Sentry SEC 47 upstand access covers and the Defender SEC 4 flush fitting access covers achieve the security ratings noted for the creation of apertures through which to pass the following test blocks:
 - 400 mm by 225 mm elliptical test block.
 - 125 mm diameter test block, where the internal opening was not sufficient in size to allow the elliptical test block to pass through.
- Certification does not cover the use of padlocks or accessories other than those listed. Utilisation of unlisted padlocks or accessories may affect the level of security offered by the access cover. The 'user friendliness' of employing the padlocks listed has not been assessed as this is beyond the scope of LPS 1175: Issue 7.
- The compatible Abloy padlocks are approved for use when bearing an alpha-numeric code denoting the date of manufacture as December 2013 or later. Alternatively, the V01 version of the equivalent padlock may be used without undermining the security rating.
- The Exec cylinder is only compatible with the Sentry SEC 47 upstand access covers and the Defender SEC 4 flush access covers.
- The security rating only applies when the outer lid is closed and locked using the compatible padlock. No security rating is attributed to the access cover when the inner lid or grid is locked but the outer lid is not.
- The security rating only applies when the access point is locked with a compatible padlock in accordance with the installation and maintenance instructions supplied with the product.
- The access covers are approved when installed and maintained in accordance with the instructions contained on the following documents:
 - Briplate SUB - SECT-INST001 (Issue 2)
 - Multi-Guard 3/Multi-Guard V3 – DFM-INST001 (Issue 2)
 - Sentry Lift-Off – UH003 (Issue 2)
 - Sentry/Sentry Mk2 – SS- INST001 (Issue 3)
 - Sentry SEC 47 – SEN-SEC47-INST 1 (Issue 1)
 - Defender SEC 4 – DEF-SR4-INST 1 (Issue 1)
