Notes:

- 1) The fencing system should only be constructed using components supplied by NK Fencing Limited.
- 2) The fencing system is available in configurations to suit either surface mounting onto hard surfaces or embedding within concrete foundations placed in the ground.
- 3) It is important to ensure the local ground onto/into which the fence is installed offers compatible strength and that the fence is installed in accordance with the documents listed in the table above entitled 'Approved Assembly and Installation Drawings'.
- 4) The 'angles in fence line' define the range of angles covered by the scope. These are measured between the attack faces of two adjacent fence panels.
